Summary

An aspiring Graduate Engineer, who has a solid knowledge of web development and is having basic knowledge of Cybersecurity. Interested in gaining experience with SQL, Python, cloud data engineering, and data processing. Enthusiastic about emerging technologies and building robust, scalable, data-driven products. Be able to work in a team, to problem solve and analyze. Looking to use technical skills, gain experience and contribute to organizational development.

Education

Bachelor of Engineering (B.E.) – Computer Science and Engineering (Cyber Security)
Nandha Engineering College (Autonomous), Erode | 2023–2027 | CGPA: 8.1

Higher Secondary Education (12th Grade)
Government Higher Secondary School, Kanjikovil, Erode | 2022–2023 | 74.5%.

Internships

Cybersecurity Intern

Csuite Tech Labs

- Practiced identifying security threats, investigation of digital evidence, monitoring network activity, assessing system weaknesses and assisting with incident investigation using hands-on application of cybersecurity and forensic tools.

Network Intern

Prompt Infotech

- Gained practical experience in computer networking including setting up networks, IP addressing, routing, switching, troubleshooting and monitoring networks, and basic network security procedures.

Projects

- **Blockchain for Preventing Counterfeit Drugs**
  Developed a medicine tracking system based on blockchain with unique ID and QR codes, using a Node.js, Express and MongoDB backend and simple AI medicine faker.
- **Direct Market Access for Farmers**
  Established a platform for farmers to directly reach out to the buyers, and minimize dependence on the middlemen, offer transparent pricing and enable farmers to have better earnings for their produce.
- **Advanced File Encryption and Decryption**
  Designed and implemented an Advanced File Encryption and Decryption system that securely encrypts files and prevents unauthorized access to files using AES (Advanced Encryption Standard) and SHA-256 for hashing.

Skills

Programming Languages: Java (Core), Python, SQL

Data Structures & Algorithms: Problem Solving, Algorithms, Data Structures

Web Technologies: HTML, CSS

Certifications

Cyber Security and Privacy – NPTEL | Blockchain for Enterprise – Infosys | Java, SQL & Python – HackerRank
