RAGUL K

Aspiring Software Engineer
Salem, India | +91 8637632230 | ragulkathir.dev@gmail.com | linkedin.com/in/ragul-k-0157b2376

CAREER OBJECTIVE

Computer Science student with a strong interest in full-stack and AI-based development. Built REST APIs during an internship and delivered projects in Java, Spring Boot, Python, and React, including a face recognition attendance system, an AI-powered fake news detector, and a campus account system. Seeking a Software Engineer role where I can keep learning and contribute to real-world projects.

SKILLS

Frontend	HTML, CSS, JavaScript, React
Backend	Java, Spring Boot, Python, FastAPI, REST APIs
Database	MySQL, JPA, H2, PostgreSQL
Tools	Git, GitHub, VS Code, IntelliJ, OpenCV
Fundamentals	DSA, OOP, DBMS, OS, CN

EDUCATION

Bachelor's Degree in Computer Science Engineering *Expected Graduation: May 2027*
Government College of Engineering, Salem-11 | CGPA: 7.65 / 10
Transferred from Government College of Engineering, Tirunelveli (08/2023 – 10/2024) | CGPA: 7.90 / 10

INTERNSHIP

Full Stack Development Intern — Odugaa Tech Pvt. Ltd.
- Built RESTful APIs and implemented frontend and backend functionality, integrating MySQL for data management.
- Practiced Git-based version control and web application deployment in a live team environment.

ACADEMIC PROJECTS

FactGuard – AI-Powered Fake News Detection System
- Built a FastAPI backend with a two-stage Gemini AI pipeline (claim understanding, then evidence-based verdict), pulling live evidence from NewsAPI, GNews, and CricketAPI.
- Built a multi-engine OCR fallback (EasyOCR, Tesseract, PaddleOCR) and URL text extraction with trafilatura; added a fact-checking layer that computes a confidence score from source credibility and evidence overlap.
  Tech Stack: Python, FastAPI, Google Gemini AI, NewsAPI, GNews, CricketAPI, OCR, HTML/CSS/JavaScript

VisionAttend – AI-Powered Face Recognition Attendance System
- Built a three-tier system: Python computer-vision pipeline, Spring Boot REST backend, and React (Vite) dashboard.
- Used OpenCV's YuNet and SFace models with cosine similarity for real-time identification from a live webcam feed, replacing a Haar Cascade + LBPH approach for higher accuracy.
- Designed REST APIs with Spring Boot, JPA, and MySQL to mark attendance idempotently and serve attendance lists.
  Tech Stack: Python, OpenCV, Spring Boot, Java, MySQL, JPA, React

College Stationery Shop – Digital Account System
- Built a full-stack replacement for a campus shop's paper account book, tracking each fresher's admission deposit, purchases, and top-ups.
- Designed a layered Spring Boot backend (Controller → Service → Repository → Entity) with REST APIs, and a React + Axios frontend with separate Student and Staff/POS portals, live search, and a sales-vs-top-up reporting endpoint.
  Tech Stack: Java, Spring Boot, Spring Data JPA, H2, PostgreSQL/MySQL, React, Axios

CERTIFICATIONS, ACHIEVEMENTS & ACTIVITIES

- Smart India Hackathon (SIH) – Participant (2025)
- CM Trophy & Zonal Level Cricket Certification – Tamil Nadu Govt. (2025)
- Active Member — Rotaract Club, GECO Tech Club, Sports Club
