Objective

Dedicated and motivated Electrical and Electronics Engineering student with a strong foundation in technical concepts, problem-solving, and practical learning. Seeking an entry-level opportunity to apply my knowledge in a professional environment, enhance my technical and analytical skills, and contribute to organizational success. Committed to continuous learning, teamwork, and delivering effective solutions to challenging tasks.

Education

GOVERNMENT COLLEGE OF ENGINEERING, SALEM| B.E. Electrical and Electronics Engineering (**Honors** in Electric Vehicle Technology)

- CGPA: 8.42(Upto Sem VI) Nov 2023 – May 2027

MUSLIM HIGH SCHOOL, KOLLUMEDU, CUDDALORE-608 303|SSLC Apr 2021

- PERCENTAGE: 100

CUDDALORE DISTRIC GOVERNMENT MODEL SCHOOL, S. KUMARAPURAM, CUDDALORE-607109|HSC Mar 2023

- PERCENTAGE: 91.66

Internship Trainee, Sriwin Electric, Salem-11.

• Gained hands-on exposure to high-voltage circuit breaker manufacturing, testing, protection systems, control panels, and safety practices in electrical power systems. (July 2025)

Internship Trainee, NLC India Limited, Neyveli

• Completed a 20-day internship at NLC India Limited, gaining hands-on exposure to thermal power plant operations, electrical systems, power generation equipment, and industrial safety practices. Developed practical knowledge of transformers, switchgear, boilers, turbines, and generators. (April 2026)

Projects

SOLAR PANEL WITH DYNAMIC SOLAR TRACKING SYSTEM

- Developed a solar tracking system that dynamically aligns the solar panel with the sun using sensors and a motorized mechanism, improving energy efficiency and power output, with scope for future IoT-based monitoring and control.

IOT BASED AUTOMATIC LOAD SHEDDING SYSTEM

- Developed an IoT-based Automatic Load Shedding System using ESP32 to monitor voltage, current, and power consumption in real time. The system automatically disconnects non-critical loads during overload conditions and enables remote monitoring through the Blynk mobile application, improving power management, system stability, and energy efficiency.

Achievements And Awards

- Actively participated in a **DCB World Records** event focused on promoting **World peace** through a large-scale origami Display (2025).

Languages

- **Tamil:** Fluent (Speaking & Writing)
- **English:** Fluent (Speaking & Writing)

Skills

* Circuit theory
* Electron device and circuit
*Digital electronics
* Power Electronics
* Electrical machine
* MATLAB / Simulink
