## ABOUT ME

Motivated and enthusiastic Computer Science and Engineering student with a CGPA of 8.02 and a strong interest in Full Stack Development. Skilled in front-end and back-end development, database management, cloud computing, cybersecurity, and data analysis through internships and academic projects. Passionate about developing scalable software solutions and continuously learning emerging technologies.

## EDUCATION

**Bachelor of Engineering** C.S.I. College of Engineering

Computer Science and Engineering

CGPA: **8.02**

**Higher Secondary (HSC)** 66.83%

**SSLC** Corona Pass

## INTERNSHIPS

**Ethical Hacking Internship** *Codi Cature*

- Learned penetration testing, vulnerability assessment, and cybersecurity fundamentals.
- Worked with network security tools and secure coding practices.

**Cloud Computing Internship** *Cloud Institutions*

- Studied cloud deployment models, virtualization, cloud storage, and cloud security.
- Learned scalable cloud infrastructure and resource management.

**Full Stack Development Internship** *Web Development*

- Developed responsive web applications using HTML, CSS, JavaScript, and database integration.
- Improved debugging, testing, and software development practices.

**Data Analysis Internship** *Let's Gametech*

- Collected, cleaned, and analyzed datasets to generate meaningful insights.
- Created visual reports to support data-driven decision making.

## PROJECTS

**Students Helping System**

- Developed a web-based student portal to provide study materials, attendance, semester results, notices, and academic resources.
- Designed a responsive user interface with secure login and database integration for efficient student information management.

**Fraud Detector**

- Developed a machine learning-based fraud detection system to identify suspicious financial transactions.
- Performed data preprocessing, feature engineering, model training, and evaluation to improve prediction accuracy.

**Blinkit Dashboard**

- Designed an interactive Power BI dashboard to visualize Blinkit sales, customer trends, and product performance.
- Created KPIs, charts, filters, and reports for effective business decision making.

## SKILLS

- Front-End Development
- Database Management
- HTML
- JavaScript
- Python
- Power BI
- Back-End Development
- Software Architecture
- CSS
- SQL
- Java
- Problem Solving

## LANGUAGES

- English
- Tamil
