SKILLS

- **Technical Skill:**Diagnostic and Theraputic Equipments handling .
- **Programming:**Java
- **Soft Skill:**Problem Solving and Team Work

AREA OF INTREST

- Diagnostic and Theraputic Equipment
- Equipment Troubleshooting

ACHIVEMENTS

- **Presentation:**Biometerials
- **Value added Course:**Biomedical Hardware Training,Modeling and Simulation Using MATLAB and C,

OBJECTIVE

Aspiring Biomedical Engineer where I can utilize my knowledge on medical devices, as well as continuously develop my technical and problem-solving skills while contributing to quality patient care.

EDUCATION

Bachelor of Biomedical Emgineer 2023 - 2027
kongunadu college of enineering and techonology | Anna university
GPA:7.65

Goverment Higher secondary School 2021- 2023
Keelaveliyur

PROJECTS

Title:BIOSENSE BIN

Description-Developed a smart biomedical waste segregation system using Arduino UNO, ESP32 Camera Module, Servo Motor, and Sensor. The system detects biomedical waste and automatically segregates it into the appropriate bin, improving waste management and reducing manual handling.
Role: Hardware and Arduino UNO Progragramming

INTERNSHIP

Internship: **26/11/2025-12/12/2025**

- Gained knowledge in BiPAP, ECG, PatientMonitor, Ultrasound, and Defibrillator machines.
- Learned the basic operation and handling of biomedical equipment.
- Improved technical knowledge through practical exposure during the internship.

Hospital Internship: **25/05/2026-08/06/2026**

- Gained practical exposure to biomedical equipment and hospital engineering practices.
- Learned the working principles and applications of X-ray Machine, CT Scanner, Patient Monitor, and other biomedical equipment.
- Observed basic equipment troubleshooting, preventive maintenance and safety procedures for biomedical devices
