PROFESSIONAL SUMMARY

Information Technology professional with a strong foundation in Python, Java, and Full-Stack Development (React, Flask, MERN). Skilled in building AI/ML-driven web applications, with hands-on internship experience developing and deploying machine learning models. Seeking to contribute through strong problem-solving ability, software engineering fundamentals, and a keen interest in AI, cloud computing, and enterprise web technologies.

EDUCATION

B.Tech. Information Technology (Honors) *2023 - 2027*

Government College of Engineering, Erode | CGPA: 8.97

TECHNICAL SKILLS

Languages: Python, Java, C

Frontend: HTML, CSS, JavaScript, React

Database: MongoDB, SQL

Tools & Platforms: Git, GitHub, Flask, Streamlit

Focus Areas: Artificial Intelligence, Machine Learning, Cloud Computing, Generative AI

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern — LITZ Tech, Coimbatore *12 Jun 2026 - 16 Jul 2026*

- Developed ML Playground, an interactive web application for training and exploring multiple machine learning algorithms using React, Flask, and Python.
- Implemented and integrated ML models including Linear Regression, Logistic Regression, Decision Tree, Random Forest, KNN, and K-Means.

Generative AI Intern — AdroIT Technologies (Virtual) *08 Oct 2025 - 23 Oct 2025*

- Developed a machine learning web application for text classification, including SMS spam detection, to classify input messages effectively.
- Built and integrated machine learning models with a user-friendly web interface to provide real-time prediction results.

PROJECTS

File Organizer System | *Python, Flask, NLTK, Matplotlib*

- Built a Flask-based utility web app to automate file organization by category, analyze text (word/line/character counts, word-frequency visualization), and convert Word documents to PDF.
- Automated directory scanning and file categorization for documents, images, media, and other file types, reducing manual effort.

Event Registration System | *MERN Stack*

- Developed a full-stack event registration system for managing technical and college symposium events.
- Implemented role-based access with Super Admin, Sub Admin, and User levels, enabling event creation, participant registration, and administration.

Customer Satisfaction Analysis and Prediction | *Streamlit, Python (ML)*

- Built a Streamlit-based application to analyze and predict customer satisfaction using machine learning techniques.
- Applied classification algorithms and performance evaluation metrics to generate predictions and analyze results.

CERTIFICATIONS

NPTEL: Human Computer Interaction (In English) - 98%, Topper 5%, Elite+Gold

NPTEL: Introduction to Industry 4.0 and Industrial Internet of Things - 90%, Topper 5%, Elite+Gold

Oracle: Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Infosys Springboard: Prompt Engineering, AI Primer Certification, Java Programming Fundamentals
