SRIDHARSHAN S

“I am an Artificial Intelligence and Data Science professional with a strong foundation in programming and problem-solving. I am passionate about developing intelligent applications and data-driven solutions”.

EDUCATION

UG	Kongunadu College of Engineering and Technology,Trichy B.Tech Artificial Intelligence and Data Science)	**2023-2027**
HSC	BHEL Matric Higher Secondary School - 70.1%	**2022- 2023**

TECHNICAL SKILLS

Programming Languages: Java , SQL, Python

Core Computer Science: Data Structures, Object-Oriented Programming (OOP), DBMS

Databases: MySQL

Data Analytics Tools: Microsoft Excel, Power BI

Web Technologies: HTML, CSS, JavaScript, React

PROJECTS

Smart Voice Assistant for the Blind using AI

Tools: Python, Speech Recognition, Text-to-Speech (pyttsx3), OpenCV, NLP

- Developed an AI-powered voice assistant to help visually impaired users interact with devices hands-free. Integrated speech-to-text and text-to-speech modules for real-time voice interaction, along with object detection to assist with navigation and daily tasks.

Resume Skill Gap Analyzer

Tools: Python, NLP, Machine Learning, Pandas, Scikit-learn

- Built a tool that compares resumes against job descriptions to identify missing skills and suggest improvements. Applied NLP-based text extraction and similarity matching to generate personalized skill gap reports for job seekers.

Brain Tumor Detection

Tools: Python, TensorFlow/Keras, CNN, OpenCV, Deep Learning

- Developed a deep learning model using Convolutional Neural Networks (CNN) to detect and classify brain tumors from MRI scan images. Trained and evaluated the model on medical image datasets to achieve reliable tumor identification accuracy.

INTERNSHIPS

AI Intern (NLP) - Sun Software Solutions, Coimbatore (June 2025)

Tools: Python, NLTK, spaCy, Machine Learning, Pandas, NumPy

- Worked on natural language processing tasks including text preprocessing, tokenization, and sentiment analysis. Assisted in building NLP pipelines to extract insights from unstructured text data and supported model training and evaluation.

Machine Learning Intern - Greensoft, Trichy (Nov 2025 - Dec 2025)

Tools: Python, TensorFlow, Keras, CNN, Deep Learning

- Worked on deep learning projects involving image classification and neural network model development. Gained hands-on experience in training, tuning, and evaluating CNN-based models for real-world datasets.
