CAREER OBJECTIVE

To begin my career as a Full Stack Developer by applying my knowledge of front-end and back-end technologies to develop efficient and scalable web applications, while continuously enhancing my skills and contributing to the success of the organization.

EDUCATION

2023 - Till now Velalar College	**B.E CSE (AIML)** CGPA : 7.3 *
2022 - 2023 Roots Matric High Sec School	**Higher Secondary Education** Percentage: 73.67%

INTERNSHIP

Chan Tech ,Erode **2026 - Till now**

- Developing a real-time backend system using Node.js and Fastify for product-based applications
- Designed and tested scalable REST APIs using Postman, ensuring reliability and performance
- Improved API response handling and optimized backend workflows for efficient data processing

SKILLS

- Languages: Java, JavaScript, Python
- Backend: Node.js, Express.js
- Frontend: HTML, CSS, Bootstrap
- Database: MySQL ,PostgreSQL
- Tools: Git, Postman

PROJECTS

Product Management REST API

- Designed and developed a scalable RESTful API using Node.js and Express
- Implemented optimized CRUD operations to efficiently manage product data
- Built for real-world use cases such as e-commerce and inventory systems
- Ensured clean API design and modular backend structure
- Github : https://github.com/PRAVEEN0E/Rest_api.git

Smart No-Due Clearance System

- Developed a full-stack application using React, Node.js, Fastify, Prisma ORM, and PostgreSQL
- Implemented secure JWT authentication and role-based access control (RBAC) for multi-user roles (students, faculty, HOD, admin)
- Designed end-to-end workflow including request submission, approval system, real-time tracking, and automated clearance generation
- Structured backend for scalability and efficient handling of concurrent user requests
- GitHub : https://github.com/PRAVEEN0E/Smart_no_due_clearance

TalentNest–Freelance Marketplace Platform

- Built a full-stack freelance marketplace using React, TypeScript, Fastify, Prisma, PostgreSQL, and Redis.
- Implemented JWT authentication, role-based access control, job posting, freelancer discovery, applications, and candidate management.
- Developed scalable REST APIs with real-time communication using Socket.IO and request validation using Zod.
- Optimized backend architecture for performance, maintainability, and concurrent user handling.
- GitHub : https://github.com/talentnest-in/TalentNest

CERTIFICATIONS

- Java Foundation Certification – Infosys Springboard | Score: 82.35% (Percentile: 82.35)
- Completed Introduction to Python – Infosys Springboard (Issued: 17 Jul 2025)
- Completed Creating Responsive Web Pages using Bootstrap 4 – Infosys Springboard
- Completed JavaScript – Infosys Springboard (Issued: 08 Jun 2025)

AREA OF INTEREST

- Full Stack Development

CO-CURRICULAR ACTIVITIES

- Won college-level internal hackathon for Smart India Hackathon selection.
- Leading the team for the current academic mini project.
- Attended value-added courses on Power BI and Prompt Engineering.
