SANJAAY PRAKASH

Phone: +91 97892 46007 | Email: pksanjaay@gmail.com | GitHub: github.com/sanjaay15

Career Objective

Motivated Artificial Intelligence and Data Science student with knowledge of Python, SQL, Machine Learning, Deep Learning, and Data Visualization. Seeking an entry-level AI/ML opportunity to apply technical skills in developing intelligent solutions and contribute to real-world projects.

Education

B.Tech – Artificial Intelligence & Data Science
Karpagam Institute of Technology
Expected Graduation: 2027
CGPA: 6.51

Technical Skills

- Programming: Python, SQL, HTML & CSS
- Data: Data Analysis, Data Visualization, Problem Solving
- AI & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative Adversarial Networks (GANs)
- Development & Tools: Git, GitHub
- Other: Software Testing Basics , Xcode

Projects

Image to Text and Voice Converter

- Integrated Natural Language Processing (NLP) concepts to process extracted textual information.
- Designed the application to improve accessibility by converting visual text into audible output.

GAN Project

- Developed an image colorization system using Generative Adversarial Networks (GANs) to transform grayscale images into colorized images.
- Applied deep learning concepts for image generation and enhancement.
- Worked with image-processing and neural-network techniques to generate realistic color outputs.

Bank Management System

- Developed an internal banking management system using Python and SQL for managing account information, transactions, and banking operations.
- Implemented database-driven functionality to organize and manage banking records.
- Designed the system specifically for internal use by bank officials.

Certifications

- IBM Machine Learning Certification
- Data Structures and Algorithms (DSA)
- Data Analysis With Python
- Data Visualization Certification
- NPTEL Certification – Education for Sustainable Resource
- Infosys – Machine Learning Certification

Strengths

- Quick Learner
- Problem Solving Ability
- Team Collaboration
- Adaptability

Internship/Hackathon

Infind Hackathon - Developed an AI Agent-based chatbot platform to automate business operations. Implemented use cases including email sending and checking, resume screening, and business task automation. Designed the platform to support AI-assisted workflows for different business operations.
