SUMMARY

Self-motivated Computer Science Engineering student with hands-on experience in Java, Python, HTML, CSS, JavaScript, and data analytics. Strong interest in software development and building responsive, practical applications. Looking to contribute technical expertise while continuously learning and developing as a software professional.

EDUCATION

B.E Computer Science and Engineering
K S Rangasamy College of Technology, Tiruchengode
2023 - 2027

HSC - Government Boys Higher Secondary School - paramathi
Percentage :61.1%
March 2023

SSLC - R.N Oxford Matriculation School - Panudamanagalam
Percentage :100%
March 2021

SKILLS

- Programming language: ,JavaScript, Python,JAVA
- Front end Technologies: HTML, CSS
- Databases: MySQL

AREA OF INTEREST

- Full Stack Development - Frontend developer
- Python
- Data Analyst

EXTRA CURRICULAR ACTIVITIES

- Participated in MSME Hackathon , EDII Hackathon and SIH Hackthon
- Attended a Workshop on Mern Stack at K S Rangasamy College of Engineering.

PROJECTS

Minicooker Cakeshop Website

- Designed and developed a responsive cakeshop web interface using HTML, CSS, and JavaScript, focusing on clean product presentation and intuitive navigation.
- Implemented responsive layouts and interactive UI elements to provide a consistent browsing experience across desktop, tablet, and mobile devices.
- Structured the website into organized sections for showcasing bakery products and improving user engagement.

Technologies: HTML, CSS, JavaScript

Comics Book Application

- Developed a responsive comic discovery and reading platform with an interactive interface for browsing and exploring comic collections.
- Implemented real-time search and category-based filtering using JavaScript to simplify comic discovery.
- Integrated Bootstrap's responsive grid and UI components to ensure a consistent experience across different screen sizes.
- Created interactive reading sections to provide users with a smooth and engaging comic-viewing experience.

Technologies: HTML, CSS, JavaScript, Bootstrap

INTERNSHIP

- Completed an 8-week Data Analytics internship focused on Python and Microsoft Power BI.
- Learned to clean, preprocess, and analyze datasets using Python and libraries such as Pandas and NumPy.
- Gained hands-on experience in exploratory data analysis (EDA) and identifying meaningful patterns and trends from data.
- Created interactive Power BI dashboards and reports using charts, KPIs, filters, and visualizations.
- Learned to transform raw data into clear, data-driven insights to support business decision-making.
- Developed practical understanding of the data analytics workflow, from data preparation and analysis to visualization and reporting.
