CAREER OBJECTIVE

To secure a challenging role in software development or AI engineering where I can apply my practical development experience and analytical mindset to build real-world products, contribute to team success, and continuously evolve as a problem-solving engineer.

EDUCATION

BACHELOR OF TECHNOLOGY

Kongu Engineering College 2023-2027
Artificial Intelligence and Machine Learning
CGPA : 7.77*

HIGHER SECONDARY

AKV Matric Hr Sec School 2022-2023
Percentage : 86%

TECHNICAL SKILLS

- **Languages:** Java, Python, C
- **Machine Learning:** NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV
- **Web Technologies:** React.js, Node.js, Express.js, HTML, CSS, MongoDB, MySQL
- **Tools:** Git, Jupyter Notebook, Google Colab

AREA OF INTEREST

- Full Stack Development
- Machine Learning

CERTIFICATION

- Oracle Java SE 17 Developer
- Oracle APEX Cloud Developer

INTERNSHIP

At ServiceNow (RiseUp with ServiceNow Alumni)

Completed hands-on training in ServiceNow platform fundamentals, ITSM, Flow Designer, App Engine Studio, UI Builder, workflow automation, scripting, AI-powered workflows, and low-code application development, culminating in the development of the Nomad Visa Hub project for digital visa and immigration management.

PROJECTS

INTERFACE — AI-Powered Virtual Company Workflow Platform

AI-driven virtual company simulation platform enabling students to work on AI-generated projects, gain practical industry experience, and receive automated performance evaluation and learning analytics.

Tech Stack: Next.js, FastAPI, PostgreSQL, Docker, AI/ML.

NOMAD VISA HUB — Digital Visa & Immigration Management System

Full-stack visa and immigration management platform providing centralized visa information, application tracking, and travel planning tools for international travelers.

Tech Stack: ServiceNow, Full-Stack Web Development, Responsive Design.

Real-Time Object Detection System

AI-based real-time object detection and tracking solution for intelligent monitoring applications using state-of-the-art computer vision models.

Tech Stack: YOLOv8, DeepSORT, MiDaS, Python, OpenCV.

Github: https://github.com/Harish-sabari-130/Real-time-object-detection-using-YOLO

FREELANCING

- Delivered a client-based website solution, focusing on requirement analysis and implementation.
