PROFESSIONAL SUMMARY

I am GUGAN MS, a B.E Metallurgical Engineering student with a Diploma in Metallurgy and two year of industrial experience at Brakes India Pvt. Ltd., I have hands-on experience in foundry operations at Brakes India Pvt. Ltd., Sholinghur, where I worked as a Supervisor – Foundry Operations. During my experience, I was involved in production supervision, melting and furnace operations, molten metal chemical composition control, casting quality inspection, and SAP-based production reporting.

Education

B.E Metallurgical Engineering - (2023-2027)

Government College of Engineering, Salem- 636011.
Grade: 7.7 CGPA (upto 6th Semester)

Diploma in Metallurgy - (2019-2022)

Sakthi Polytechnic College, SakthiNagar, Erode- 638315.
Grade: 93 % (Supperlative Distinction)

SSLC (10th) - (2018-2019)

Government Boys Higher Secondary School, Bhavani-638301
Grade: 73 %

WORKSHOP

Iron and Steel Making (2 days)

@GCE Salem on 27th & 30th January 2026.

Co-Curricular Activities

- Won prizes in SFAME intera departmental Symposium at GCE Salem.
- Organizing events in SFAME and METMAT department events.
- Publising Article in Department annual SFAME book.

EXPERIENCE

Junior Engineer (June 2022 - July 2024)

- Supervised day-to-day foundry production activities to ensure smooth, continuous, and efficient manufacturing operations.
- Monitored and controlled molten metal chemical composition to achieve specified quality standards and process requirements.
- Conducted in-process quality inspections and ensured compliance with casting quality standards, reducing production defects.
- Managed SAP-based production data entry, reporting, and documentation to support accurate production planning and traceability.
- Implemented and maintained industrial safety practices, ensuring compliance with workplace safety regulations and standard operating procedures.
- Optimized melting and furnace operations to improve energy efficiency, reduce power consumption, and enhance overall process productivity.

Achievement

- Implemented process monitoring methods to identify production issues early, minimizing downtime and improving productivity.
- Improved furnace charging practices to reduce waiting time and enhance overall production efficiency.
- Reduced production delays by improving coordination between melting, moulding, and casting operations.

Internships

JS Autocast Foundry India Pvt ltd

17/06/2026 - 30/06/2026

- Completed a 14-day extended internship at JS Autocast SG Iron Foundry, focusing on IoT-based furnace monitoring and control systems.

Steel Authority of India Limited

07/11/2025 - 15/11/2025

- Completed a 9 days internship at SAIL, a Central Public Sector Enterprise, gaining exposure to HRM and CRM functions.

MINI PPROJECT

A Metallurgical study on Self hardening of aluminium alloy castings by addition of fly ash.
