PROFESSIONAL SUMMARY

Aspiring SOC L1 / Junior SecurityAnalyst with hands-on training in SIEM (Wazuh),EDR (Sophos), network security monitoring, log analysis, and Incident Response. Skilled in analyzing security events using Wazuh, Snort, Wireshark, and tcpdump, and applying the MITRE ATT&CK framework, Windows Event Logs, firewalls, IDS/IPS, and access control. Familiar with AWS security (IAM, VPC, EC2, S3, CloudTrail, CloudWatch) and hands-on with Nmap, LetsDefend, and Burp Suite through the PortSwigger Web Security Academy. Strong foundation in TCP/IP, the , DNS, HTTP/HTTPS, vulnerability assessment, and incident documentation, with basic knowledge of Root Cause Analysis (RCA), Minutes of Meeting (MoM), and Digital Forensics. Keen interest in security monitoring, alert triage, incident analysis, forensic investigation, and security documentation.

TECHNICAL SKILLS

- SIEM: Wazuh
- EDR: Sophos
- Network Security & Monitoring: Snort, Wireshark, tcpdump, IDS/IPS, Firewalls
- Incident Response & Reporting: Alert Triage, Incident Analysis, Incident Documentation, RCA, MoM
- Threat Detection: MITRE ATT&CK Framework, IOC Analysis, Windows Event Logs
- Digital Forensics: Basic Knowledge of Evidence Collection, Log Analysis, and Forensic Investigation
- Cloud Security (AWS): IAM, VPC, EC2, S3, CloudTrail, CloudWatch, AWS CLI
- Vulnerability Assessment: Nmap, Burp Suite, OSINT Techniques
- Networking: TCP/IP, OSI Model, DNS, HTTP/HTTPS
- Security Controls: Firewalls, IDS/IPS, Access Control
- Operating Systems: macOS, Linux (Kali Linux, Ubuntu), Windows
- Security Tools: LetsDefend, PortSwigger Web Security Academy, OpenVPN
- Security Fundamentals: Vulnerability Assessment, Security Monitoring, Alert Triage

CYBERSECURITY / SOC TRAINING & SKILLS

SIEM, EDR, Network Security & Cloud Security Training

- Completed training in SIEM Operations (Wazuh), Endpoint Detection and Response (Sophos EDR), and Network Traffic Monitoring & Analysis using Snort, Wireshark, and tcpdump.
- Covered Incident Response Fundamentals, Incident Reporting, MITRE ATT&CK Framework, and security controls including Firewalls, IDS/IPS, and Access Control.
- Covered AWS Security Fundamentals including IAM, VPC, EC2, S3, CloudTrail, CloudWatch, and AWS CLI
- Gained foundational knowledge in Windows Log Analysis using Windows Event Viewer, including security event monitoring and basic event investigation.

CYBERSECURITY / SOC PROJECTS

Network Scanning & Enumeration

- Used Nmap multiple times during cybersecurity training to scan hosts and identify open ports.
- Enumerated running services to identify potential security risks in lab environments.
- Analyzed scan results and documented identified ports and services.

SOC Training — LetsDefend

- Completed 15+ hands-on SOC challenges on the LetsDefend platform.
- Investigated security alerts using IP addresses, domains, logs, and IOCs.
- Practiced incident triage and identified relevant MITRE ATT&CK techniques.

EDUCATION

Bachelor of Engineering — Computer Science and Engineering (Cyber Security)
Sri Shanmugha College of Engineering and Technology | 2023 – 2027

CERTIFICATIONS

- Zscaler — Zero Trust Cloud Security
- NPTEL — Cyber Security and Privacy
- Great Learning Academy — Types of Cyber Security
- TCM Security — Linux 100: Fundamentals

EXPERIENCE / TRAINING

- Strong analytical and problem-solving mindset, applied to identifying security vulnerabilities and understanding attacker techniques.
- Continuous learner with a hands-on, lab-based approach to cybersecurity.
- Genuine interest in ethical hacking, security monitoring, and incident analysis.

ACHIEVEMENTS & ACTIVITIES

CDACINDIA Bug Bounty Challenge 2026 – Bengaluru | Participant

- Competed in the CDACINDIA Bug Bounty Challenge 2026 in Bengaluru, gaining hands-on exposure to kernel and OS security.
- Identified 3 security bugs during hands-on cybersecurity activities.
- Completed practical technical sessions on vulnerability identification and OS security.
