CAREER OBJECTIVE

To begin my career in a professional environment where I can apply my technical skills and gain real-world experience.
To continuously learn new technologies and contribute effectively to the growth of the organization.

PROJECT

Event Tracking:

- Developed a web-based leave and event management system for educational institutions.
- Enabled students to submit leave and event requests online.
- Allowed faculty to view, review, and manage submitted requests.
- Built the frontend using React.js and TypeScript.
- Used Spring Boot, Node.js, and MySQL for backend and database management.

Socratic AI Tutor module:

- Developed an AI-powered self-evaluation platform for learners.
- Used Socratic questioning to evaluate conceptual understanding.
- Guided users through a series of context-aware questions without revealing the final answer.
- Helped learners identify knowledge gaps through interactive assessment.

EDUCATION

Bachelor of Engineering in CSE **2023 - Present**

Government college of engineering,Erode
CGPA:7.83

Higher Secondary Education **2021 - 2023**

Sri Vijay Vidyalaya matric Hr sec school,Dharmapuri
Percentage:87.6%

TECHNICAL SKILLS

- Programming Languages: Python
- Web Technologies: HTML, CSS
- Database: MySQL, SQL
- Tools: GitHub, VS Code

INTERNSHIP

Full Stack intern - Kaashiv infotech **Jun 2026 - 1 Month**

Developed a Nowcast Weather System using Python (FastAPI), HTML, CSS, JavaScript, and SQL for location-based real-time weather monitoring. Integrated FastAPI to process weather data and display temperature, humidity, pressure, and wind speed through graphs. Stored weather data in an SQL database for retrieval and analysis.

CERTIFICATIONS

- Python – Coursera
- C Programming Coursera

EXPERIENCE

- Participated in hackathons,enhancing practical development skills
- Improved coding and logical thinking through Hackerrank
