## Career Objective

Information Technology undergraduate seeking an entry-level software development role to apply full-stack development, API integration, database management, and AI integration skills while building reliable and user-focused applications.

## Technical Skills

**Languages:** Java, Python (Basics), JavaScript
**Frontend:** HTML, CSS, React.js
**Backend:** Node.js, Express.js
**Databases:** MongoDB
**Tools & Technologies:** REST APIs, JWT, Git, GitHub

## Internship Experience

**LITZ Tech** **12 Jun. 2026 – 16 Jul. 2026**
*Full-Stack Developer Intern* *Coimbatore*

- Engineered StudentOS, an AI-powered student productivity platform using MERN and Google Gemini API, consolidating tasks, notes, expenses, habits, and interview preparation into a unified platform.
- Implemented secure JWT authentication and REST APIs with Node.js, Express.js, and MongoDB, enabling authenticated access and reliable data management across multiple modules.
- Integrated Google Gemini API for AI-driven task breakdown, note summarization, flashcard generation, productivity insights, and interview evaluation, adding personalized assistance to the platform.

**EazyByts Web Solutions** **01 Jul. 2026 – 31 Jul. 2026**
*Web Developer Intern* *Virtual*

- Developed a full-stack portfolio CMS using React.js, Node.js, Express.js, and MongoDB, implementing JWT authentication and CRUD operations for managing projects, blogs, and contact data.
- Built Summit, a MERN-based stock market dashboard integrating Finnhub, NewsAPI, and Gemini API for market data, news, portfolio tracking, watchlists, and AI-powered insights.
- Implemented simulated trading, transaction history, gain/loss analysis, and virtual-fund portfolio tracking, enabling end-to-end exploration of stock-market workflows.

## Education

**Government College of Engineering, Erode** **Sep. 2023 – 2027**
*B.Tech in Information Technology (Honors)* *CGPA: 8.79/10*

## Projects

**StudentOS — AI-Powered Student Productivity Platform** *MERN, Gemini API, JWT, MongoDB*

- Built an integrated student platform combining tasks, notes, expenses, habits, and interview preparation under a single authenticated system.
- Integrated Google Gemini API for task breakdown, note summarization, flashcard generation, expense and habit insights, interview evaluation, and productivity summaries.
- Implemented JWT authentication, REST APIs, and MongoDB database operations to support secure access and persistent application data.
- https://github.com/Maha-2327/StudentOS | https://studentos-7f6c.onrender.com/

**Summit — Stock Market Dashboard** *MERN, Finnhub, NewsAPI, Gemini*

- Developed a stock market dashboard with live prices, simulated buy/sell trading, portfolio tracking, gain/loss analysis, and watchlists.
- Integrated Finnhub, NewsAPI, Google Gemini API, and Recharts for market data, financial news, visualizations, and AI-powered explanations.
- Implemented transaction history, simulated price alerts, portfolio analysis, and virtual-fund trading functionality to support realistic portfolio workflows.
- https://github.com/Maha-2327/EazyByts_2 | https://eazybyts-2-x09o.onrender.com

**Customer Satisfaction Analysis & Prediction** *Python, Scikit-learn, Streamlit*

- Developed a Streamlit application to analyze customer survey data and predict customer satisfaction using machine learning models.
- Implemented Decision Tree and Random Forest models with Scikit-learn for customer satisfaction prediction and model evaluation.
- Performed data preprocessing, visualization, and evaluation using Pandas, NumPy, Matplotlib, Seaborn, and Scikit-learn.

## Certifications

- **NPTEL** — Human Computer Interaction (2026)**:** 99%, Top 2%, Elite + Gold
- **NPTEL** — Introduction to Industry 4.0 and Industrial Internet of Things (2025): 93%, Top 2%, Elite + Gold
- **Infosys** — Learning Python (2025)
- **Infosys** — Java Programming Fundamentals (2025)
