# PRIYANKA G

Dharmapuri, Tamil Nadu, India

gpriyanka17052006@gmail.com | +91 8248737651 | LinkedIn | Github | Portfolio

## PROFILE SUMMARY

- Final-year IT student who prefers building complete, working applications rather than stopping at prototypes, comfortable across the backend, the database, and the interface on top.
- Gained practical experience through two internships, one in AI/Data Science and one in Cybersecurity, where I worked on fixing real code issues, checking systems under everyday constraints, and writing notes clear enough for someone else to follow.
- Solid grounding in Data Structures & Algorithms, DBMS, and Artificial Intelligence fundamentals

## EDUCATION

**B. Tech. Information Technology** | Government College of Engineering, Erode *Anna University* *Expected May 2027*
*| CGPA: 8.57 / 10.0 (through 6th semester)*
Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems, Human-Computer Interaction, Artificial Intelligence, Industry 4.0 & IIOT.

## ACADEMIC & TECHNICAL PROJECTS

### Smart Face Recognition Attendance System | *Python, Flask, OpenCV, SQLite* *Jun 2026*

- Built a real-time face recognition attendance system using OpenCV LBPH and Haar cascades with Flask, replacing manual roll-call with automatic check-ins.
- Structured the app across 8 Flask route blueprints with role-based authentication, CSRF protection, IP rate limiting, and SQL Alchemy ORM for the database layer.
- Built a training pipeline capturing 40 face samples per student with CLAHE preprocessing, plus an analytics dashboard with trend charts and CSV/Excel export.
- Wrote 176 tests across Python and JavaScript (all passing), then deployed on Render using Gunicorn.

### College Connect — Student Management Portal | *HTML, CSS, JS, Firebase, Netlify* *Jan 2026*

- Built College Connect as a single portal managing attendance, marks, leave, and announcements across 7 departments and 4 academic years, serving 200+ students with Admin and Student dashboards.
- Set up Firebase security rules across 6+ data nodes for role-based access control, and fixed 5 production bugs including a configuration mismatch breaking frontend-backend communication.
- Deployed on Netlify with continuous deployment and wrote 1,600+ lines of modular front-end code; ran end-to-end tests across registration, login, database, and logout before release.

## INTERNSHIP EXPERIENCE

### AI & Data Science Intern | *TVK Technologies* *June 2026*

- Extended the facial recognition pipeline at TVK Technologies using Python and OpenCV, resolving 5 bugs affecting recognition accuracy and system stability.
- Verified recognition modules across multiple test cases to confirm consistent performance, and wrote 10 pages of documentation covering code structure, key functions, and deployment steps.

### Cyber Security Intern | *Xplore IT Corp, Coimbatore* *Jun – Jul 2025*

- Used Nmap to scan 7 test environments for vulnerabilities — looking for open ports, misconfigured services, and weak spots. Documented every finding with the issue, affected system, severity, and a clear fix, so the team could act without wasting time.
- Grouped findings by severity (Critical, High, Medium, Low) and built actionable remediation reports. Learned network security hands-on — attack patterns, firewall rules, and practical system hardening — not just theory.

## TECHNICAL SKILLS

- Programming Languages: *Python, Java, SQL, JavaScript*
- Web Technologies: *HTML5, CSS3, Bootstrap 5, Flask*
- Databases: *SQLite, MySQL, MongoDB, Firebase Realtime Database*
- Tools & Platforms: *Git, GitHub, Netlify, Render, Vercel , Gunicorn, VS Code, Linux (Ubuntu), Excel, Power BI*

## CERTIFICATIONS & ONLINE COURSES

- NPTEL Elite — Human Computer Interaction (Score: 93%), *2026*
- Python for Beginners — Udemy, *2026*
- NPTEL Elite — Industry 4.0 & Industrial Internet of Things (Score: 80%), *2025*
- Java Programming Fundamentals — Infosys Springboard, *2025*

## LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Documentation Team Member, FOSS GCEE — contributed to technical documentation and supported open-source community events on campus.
