

DHARAN D

Cyber Security Analyst |Ethical Hacker | SOC | VAPT

Cyber Security Engineering graduate with hands-on experience in SOC operations, vulnerability assessment, and penetration testing gained through a dedicated internship and lab practice on TryHackMe and Hack The Box. Built an AI-powered network scanner (DeepProbe) and an ML-based APT detection system

TryHackMe Hack The Box

Education

Cyber Security

- VAPT
- SOC Operations
- Incident Response
- Threat Analysis
- Ethical Hacking
- Log Analysis
- OWASP Top 10
- MITRE ATT&CK

Security Tools

- Nmap, Wireshark
- Burp Suite, Metasploit
- SQLMap, Hydra
- Hashcat, Aircrack-ng
- Wazuh, Splunk

Networking

- TCP/IP, DNS, HTTP/HTTPS
- Routing & Switching, VLANs
- Subnetting, Firewalls, VPN

OS & Programming

- Windows, Windows Server
- Kali Linux, Ubuntu
- Python, Bash, Basic Ruby

PLATFORM & PRACTICE

TryHackMe & Hack The Box – Practice across SOC analysis, penetration testing, and web exploitation labs.

Experience

2026
Systech, Trichy
Cyber Security Intern

- Conducted vulnerability assessments on lab environments, identifying and documenting 15+ security weaknesses with CVSS severity scores and remediation recommendations.
- Performed penetration testing using Nmap, Burp Suite, and Metasploit across web application and network targets following a structured methodology.
- Monitored network traffic, analyzed security logs, and produced structured vulnerability reports with remediation recommendations for the training team.

Projects

DeepProbe — AI-Powered Network Scanner

- Built an advanced network scanner with an integrated AI assistant for scan result explanations and remediation guidance; implemented live topology visualization and automated PDF reporting.

Stack: Python, Nmap API, OpenAI/Claude API, NetworkX, ReportLab

APT Detection Using Machine Learning and Network Flow Analysis

- Developed a Gradient Boosting classifier to detect APTs from network traffic, achieving 94%+ detection accuracy on the CIC-IDS2018 dataset using flow-level feature extraction.

Stack: Python, Scikit-learn, Pandas, CIC-IDS2018 dataset

Credit Card Fraud Detection System

- Built a fraud classification model achieving 97% precision using Random Forest with SMOTE oversampling on an imbalanced transaction dataset.

Stack: Python, Scikit-learn, Imbalanced-learn, Matplotlib

CERTIFICATIONS

- Zscaler Zero Trust Associate (ZTCA) — Zscaler
- Ethical Hacking & Networking Course — Systech, Trichy (Oct 2025 – Mar 2026)
- Cyber Security Training — Edutantr, Bangalore (Jul 2025 – Sep 2025)
- Networking Basics — Theeran Hub
- Ethical Hacking Basics — Alpha Academy

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering (Cyber Security)
Sengunthar Engineering College (Autonomous), Tiruchengode
Graduation: 2026
CGPA: 8/10
