## CAREER OBJECTIVE

Motivated B.Tech Information Technology student (2027) with hands-on experience in Java, Spring Boot, React, Selenium WebDriver, TestNG, and SQL. Strong understanding of Object-Oriented Programming, Data Structures & Algorithms, full-stack web development, REST API design, software testing, and test automation. Seeking a Graduate Engineer Trainee / Software Engineer role to apply technical skills, contribute to software development and quality assurance, and continuously grow in a dynamic engineering environment.

## EDUCATION

**B.Tech, Information Technology** | Knowledge Institute of Technology, Salem *Aug 2023 – May 2027*

- CGPA: 7.7/10 (up to 5th Semester)

**HSC (12th Grade) — 86%** | Vetri Vikas Higher Secondary School *May 2021 – Jun 2022*

## TECHNICAL SKILLS

- **Languages:** Java, HTML, CSS, SQL, JavaScript, React
- **Backend & APIs:** Spring Boot, RESTful APIs, Spring Data JPA
- **Testing & Automation:** Selenium, TestNG
- **Tools & Version Control:** Git, GitHub
- **AI-Assisted Development:** Prompt Engineering, AI-Assisted Development (Vibe Coding)

## INTERNSHIP EXPERIENCE

**Java Development Intern** | Future Focus Infotech (Remote) *Dec 2025 – Jan 2026*

- Applied Java, OOP, Collections, Exception Handling, and File Handling to develop programming solutions.
- Built a responsive web application using HTML, CSS, JavaScript, and Git.

**AI & Machine Learning Intern** | Kodacy (Virtual) *Dec 2025 – Jan 2026*

- Gained hands-on experience in AI, Machine Learning, Prompt Engineering, and Retrieval-Augmented Generation (RAG).
- Developed a Python-based AI chatbot, strengthening Python and AI application development skills.

## PROJECTS

**Selenium TestNG QA Automation Framework** | Java, Selenium 4, TestNG *Jan – Jul 2025*

- Developed a Selenium WebDriver automation framework for the SauceDemo e-commerce website using **Page Object Model (POM)** and TestNG.

**JLPT Adaptive Prep App | 2026** | Spring Boot, React.js, JavaScript, REST API, SQL *June – Jul 2026*

- Developed a full-stack adaptive JLPT N5/N4 preparation platform with dynamic difficulty, timed mock tests, and category-based performance analytics.
- Built a **Spring Boot** backend exposing RESTful APIs for question delivery, adaptive question selection, test submission, and result analysis, with layered Controller–Service–Repository architecture.
- Replaced browser LocalStorage with server-side persistence using **Spring Data JPA**, storing users' test history and performance data in a relational database so progress is retained across sessions and devices.
- Integrated reusable React components with the REST APIs to render mock tests, detailed result analysis, and performance dashboards.

## ACHIEVEMENTS

- 1st Place — Susegad Sprint 2026 Hackathon (Render-sponsored): delivered a working web solution in 24 hours; recognized for technical depth, clean architecture, and real-world applicability.

## CERTIFICATIONS

- JLPT N5 (Japanese) Certification
- JLPT N4 (Japanese) Certification
- FutureSkills Prime — Acquiring Data (2024)

## LANGUAGES

- English (Professional), Japanese (Intermediate).
