Experience

Program and Project Management Analyst — Jan 2026 - Present
Verizon — Chennai

Program Management:

- Standardized system and process compliance by directing a Joint Governance Program, managing full-lifecycle initiatives from initial risk analysis and change management to long-term control and monitoring.
- Optimized facility utilization, executed space planning initiatives across major India hubs, and reduced operational costs by analyzing intense performance reports, brainstorming innovative solutions, and executing targeted resource strategies to resolve operational gaps.
- Facilitated organizational change management and aligned stakeholder expectations by designing and delivering high-impact, executive-level presentations for director review to bridge project goals with business needs.

Reporting & Data Analytics:

- Developed and automated high-impact workforce dashboards and weekly and monthly key metrics reports from complex datasets through, giving executive leadership actionable visibility into organizational health and performance trends.
- Conducted deep-dive data audits to ensure data integrity across all operational and performance reporting.
- Authored comprehensive Standard Operating Procedures for critical reporting workflows, standardizing Knowledge Transfer processes and ensuring long-term business continuity and delivering high-level presentations to key stakeholders.

Senior Executive — May 2023 - Dec 2025
HCLTech — Chennai

Management Information Systems (MIS):

- Developed dynamic Power BI dashboards and executed end-to-end data extraction and analysis for critical enterprise pipelines, RFPs/RFIs, and ELT reports—accelerating senior leadership performance reviews by establishing a robust, data-driven operational cadence.
- Spearheaded advanced process mining and rigorous data reconciliation to identify operational bottlenecks, manage CAPA trackers, and deliver actionable strategic insights that successfully optimized workflow efficiency and informed executive decision-making.

Project Management:

- Managed cross-functional portfolios of multiple projects, collaborating with diverse stakeholders to align deliverables and drive execution.
- Directed the full project lifecycle by developing detailed plans and timelines to ensure every project milestone was met, utilizing timesheets and sprint reports to monitor project health, mitigate risks, and conduct post-project evaluations for continuous improvement.

Business Operations:

- Conducted secondary research and managed ad-hoc data requests. Improved reporting processes and SOPs, ensuring high-quality standards, performing audits, and developing data management strategies to streamline operations and improve data accuracy.
- Provided training and support to team members on MIS tools and reporting processes, assisting with troubleshooting, report updates, and collaborating with cross-functional teams to enhance business insights and performance.
