ABOUT ME

Driven IoT and Embedded Systems Engineer with hands-on experience in Arduino, sensor integration, and automation systems. Passionate about designing smart, reliable hardware solutions and leveraging technology to optimize automated processes. Ready to contribute technical expertise and innovative problem-solving to high-impact engineering projects.

SKILLS

- Python
- Networking
- Basic Electronics
- Embedded System

CERTIFICATIONS

- **NPTEL Certification in (Introduction to Industry 4.0and Industrial Internet of Things).**

LANGUAGES

- **English**
- **Tamil**

PROJECTS

BATTERY MONITERING SYSTEM IN ELECTRIC TROLLRY

Developed an IoT-based system to monitor battery voltage, current, and temperature in real time using ESP8266, INA219, DS18B20, and a voltage divider. Integrated Wi-Fi and Blynk IoT platform for remote monitoring, data visualization, and alerts for abnormal battery conditions, improving battery safety, reliability, and lifespan of the Electric Trolley.

DESIGN AND FABRICATION OF CONVEYOR INTERRUPTING SYSTEM

Designed and fabricated an IoT-enabled conveyor interrupting system to automatically monitor and control material movement on a conveyor line. Integrated IoT-based monitoring and control to improve automation, operational efficiency, and safety while reducing manual intervention.

EDUCATION

Kongunadu Collage of Engineering and Technology.
ELECTRICAL AND ELECTRONICS ENGINEERING
2023 - 2027
CGPA: 6.69

Kongunadu Matriculation Higher Secondary School.
Class 12 2023
Percentage : 72.5%

Kongunadu Matriculation Higher Secondary School.
Class 10 2020

INTERNSHIP

- **INTERNSHIP TRAINING “SMW HYDRAULICS” IN ERODE**
- **INTERNSHIP TRAINING "SMILE TECH 3D" IN COIMBATORE.**
