SURIYA PRABHA G

CAREER OBJECTIVE

Ahighly motivated Electronics and Communication Engineering student with hands-on experience in IoT-based systems and embedded development, seeking an entry-level role where I can apply my technical knowledge in real-time problem solving, contribute to innovative projects, and continuously enhance my skills in both software and core engineering domains.

EDUCATION

- **ELECTRONICS AND COMMUNICATION ENGINEERING**
  KnowledgeInstitute of Technology
  2023-2027 (7.5)CGPA

- **Higher Secondary Certificate**
  Jayarani Matriculation Higher Secondary School
  2022 - 2023 (75%)

- **Secondary School Leaving Certificate**
  Jayarani Matriculation Higher Secondary School
  2020-2021 (ALL PASS)

SKILLS

Technical Skills

- **Programming:**
  - C
  - Java
  - OOPs(Basics)
- **Tools:**
  - LT Spieces
  - MATLAB EDA
  - Playground

Soft Skills

- Adaptability
- coordination
- Multitasking ability
  Team Thinking
- Effective

CERTIFICATION AND ACCOMPLISHMENT

- **QUEST GLOBAL INGENIUM** -Selected for Round 2 in Southwest Global Ignition for a project idea.
- **PAPER PRESENTATION** -"Smart Agriculture using IoT for Efficient Farming"at AVS Collage
  -"Artificial Intelligence in Everyday Life"at Bannari Amman Collage

PROJECTS

Street Light Fault Detection System

- Developed an IoT-based system to automatically detect street light failures using sensors
- Implemented real-time fault identification and alert mechanism
- Focused on improving maintenance efficiency and reducing manual inspection

Women Safety Pendant

- Built a wearable IoT device designed to enhance personal safety
- Integrated alert mechanism for emergency situations
- Designed for quick response and real-time communication

Blind Stick

- Developed a smart blind stick using ensors for obstacle detection.
- Implemented real-time alert system using buzzer for users safety.
- Applied embedded systems concepts to enhance practical electronics skills

INTERSHIPS

SANS INNOVATIONS(Feb 2024)

- Worked on embedded system design for basic industrial applications.
- Implemented microcontroller-based solutions with sensor integration.

STACK QUEUE (Dec 2024)

- Designed user-friendly interfaces focusing on usability.
- Created wireframes and prototypes for better user experience.
