PROJECTS

AI-Generated Course Curriculum Designer

- Developed an AI-based tool to automatically generate personalized course curricula based on user inputs and learning goals. Implemented features to suggest topics, structure content, and enhance learning efficiency.

Smart Kitchen Recommendation System Using IoT

- Developed a simulated IoT-based kitchen application that recommends recipes based on available ingredients. Designed to improve meal planning and reduce food waste through intelligent recommendations.

CERTIFICATIONS

- Privacy and Security in Online Social Media - **NPTEL**
- Design Implementation and HumanComputer Interface - **NPTEL**
- Getting Started with Generative AI - **IBM**
- Edge **AI-PAPER PRESENTATION**
