PROFESSIONAL PROFILE

Electronics and Communication Engineering student committed to continuous learning and professional growth, with a keen interest in VLSI and Digital Electronics. Eager to gain practical experience in digital circuit design, CMOS-based circuit design, and VLSI development while strengthening knowledge of semiconductor technologies. Aspiring to contribute to the design, development, and testing of innovative VLSI solutions in a collaborative engineering environment.

TECHNICAL SKILLS

- **Design & Simulation Tools:** LTspice, Vivado, EDA Playground
- **Development Environment:** Visual Studio Code
- **Programming Languages:** C, Java
- **Core Domains**: Digital Electronics, VLSI Fundamentals, Basic Electronis

ENGINEERING PRACTICES

- System validation and functional testing
- Structured problem solving and root cause analysis
- Hardware design analysis and troubleshooting
- Technical documentation and clear communication of design decisions

EDUCATION

2023 - 2027
Bachelor of Engineering - Electronics and Communication Engineering
Knowledge Institute of Technology
CGPA: 8.5

2022 - 2023
Sri Sarada Vidyalaya Hr Sec School for Girls
(75% Secured)

2019 - 2020
SRK Matric Higher Secondary School
(All Pass)

TECHNICAL PROJECTS

IoT- Based Safety Monitoring System for Sanitation Workers :

- Designed a dual-unit embedded system comprising a worker unit and a monitoring unit for real-time safety monitoring.
- Detected hazardous gases, monitored heart rate and fall events, and transmitted alerts to the monitoring unit using LoRa and GSM.
- Integrated sensors with the embedded hardware and validated system performance through functional testing.

Wireless Controlled Grass-Cutting Robot :

- Designed and developed a microcontroller-based grass-cutting robot with wireless control.
- Built a custom mobile application using MIT App Inventor to control the robot remotely.
- Performed hardware integration, wireless communication, and functional testing.

INTERNSHIP EXPERIENCE

Embedded Systems Intern – Sans Innovations
Learned embedded system fundamentals and system workflow.
Observed hardware integration and testing processes.

Machine Learning Intern – Dev Technology Solution
Gained foundational knowledge of Machine Learning concepts and methodologies.
Developed an understanding of the Machine Learning workflow, including data processing and model training.

ACHIEVEMENTS & ACTIVITIES

- Secured 1st Prize at the Engineering Clinic for developing a Wireless-Controlled Grass-Cutting Robot using MIT App.
- Presented a paper on "Mobile App for Farmer Direct Market Access" at Bannari Amman Engineering College.
- Attended a workshop on Drone Technology at Kongu Engineering College.
