HTML: Skilled in creating responsive and user-friendly web pages using HTML.
SQL: Knowledge of writing SQL queries, managing databases, and performing CRUD operations.
Programming Skills: Quick learner with strong analytical, debugging, and logical thinking abilities.

PROJECT

College Hostel Management System

My mini project is College Hostel Management System.
The main objective of this project is to simplify hostel management in colleges.
It helps the hostel staff manage student records, room allocation, and fee details efficiently.
Students can be assigned rooms based on availability, reducing manual work.
The system stores all hostel information securely in a MySQL database.
It also helps in tracking student details and hostel occupancy.
The project was developed using ASP.NET for the front-end and MySQL Server for the back-end.
This system reduces paperwork, saves time, and improves accuracy in hostel administration.
Through this project, I gained practical experience in web development, database management, and teamwork.
Overall, the project improves the efficiency of hostel management and provides a user-friendly solution.

CERTIFICATE

Introduction to Internet of Things – NPTEL
Jan–Apr 2026 | 12-Week Course
4 Credits | Score: 57%

Getting Started with Cisco Packet Tracer
Cisco Networking Academy | Completed on 30 Nov 2025
