PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate (CGPA: 6.8) with a strong foundation in circuit design, programming, and applied AI/ML. Built and delivered multiple hardware-software projects, including a deep learning-based diagnostic tool and an automated safety monitoring system. Recognized at national-level hackathons for developing practical, technology-driven solutions. Looking to bring strong analytical and problem-solving skills to a challenging engineering role.

EDUCATION

B.E. - Electronics and Communication Engineering *2022 - 2026*
Kongunadu College of Engineering and Technology, Trichy | CGPA: 6.8

Higher Secondary Certificate (HSC) *2022*
Dhanalakshmi Srinivasan Matric Higher Secondary School, Trichy | 67.6%

Secondary School Leaving Certificate (SSLC) *2020*
Dhanalakshmi Srinivasan Matric Higher Secondary School, Trichy | 69.4%

TECHNICAL SKILLS

- **Programming:** C, Python
- **Engineering Tools:** MATLAB, AutoCAD
- **Hardware:** Circuit Design, Electronic Components, Sensor Integration
- **Digital Marketing:** SEO, Content & Social Media Marketing

EXPERIENCE

Research Assistant – R&D Department *Jun 2026 - Present*
Kongunadu College of Engineering and Technology, Trichy

- Assisting faculty with ongoing research and project work within the R&D department.
- Supporting project planning, execution, and documentation for department initiatives.
- Contributing to data collection and analysis to aid research outcomes.

Web Development Intern *Jun 2024 - Jul 2024*

- Developed and maintained responsive web pages for client-facing projects.
- Implemented SEO strategies that improved website traffic and search visibility.
- Prepared technical documentation to support ongoing web development work.
- Collaborated with a cross-functional team to deliver solutions on schedule.

PROJECTS

Deep Learning-Based Screening System for Respiratory Diseases *Final Year Project*

- Designed and trained a deep learning model to support early detection of respiratory diseases from medical data.
- Applied data analysis techniques to improve the accuracy and reliability of diagnosis support.

Automated Wheelchair using Arduino Uno

- Designed and built a smart wheelchair with Arduino Uno-based control for improved user mobility.
- Programmed the embedded control logic to deliver an efficient, user-friendly navigation experience.

Gas Leakage Detection System

- Built a safety monitoring system using gas sensors to detect leaks in real time.
- Implemented an automated alert mechanism for early warning and accident prevention.

CERTIFICATIONS (VALUE ADDED COURSES)

- **Advanced Embedded System Application and IoT Programming** — real-time system design and IoT application development
- **Python Programming** — core programming concepts, logic building, and applied problem-solving

ACHIEVEMENTS

- Secured Top 10 (National Level) at ANRF AISE Hack 2026, IIIT Hyderabad, for a flood detection solution built with U-Net and ResNet18 deep learning models.
- Selected as an All-India Finalist at the IISF Hackathon, Chandigarh, for a project on eDNA-based marine biodiversity monitoring.
- Shortlisted for the VIT Bhopal Hackathon for an IoT-based remote patient monitoring system.
- Presented a research paper on Brain Tumor Detection using AI/ML at Mahendra College of Engineering, Salem.
- Presented a research paper on AI Techniques at Karpagam College of Engineering, Coimbatore.

SOFT SKILLS

- Teamwork
- Time Management & Punctuality
- Adaptability to New Environments

LANGUAGES

- English (Fluent)
- Tamil (Native)
- Hindi (Conversational)
