Career Objective

Aspiring SOC Analyst with hands-on knowledge of SIEM, security monitoring, log analysis, alert triage, threat detection, and incident response fundamentals. Familiar with Wazuh, Splunk, and Elastic Stack, with knowledge of MITRE ATT&CK, Windows Event Log Analysis, IOC analysis, and vulnerability management. Seeking an entry-level SOC Analyst role to apply my cybersecurity skills in monitoring, investigating, and responding to security incidents.

Technical Skills

Networking & OS
TCP/IP | OSI Model | IP Addressing | DNS | DHCP | TCP vs UDP | HTTP/HTTPS | Common Ports | Wireshark | Network Traffic Analysis | Packet Analysis | Windows & Linux | Firewall Monitoring | VPN Monitoring

SIEM / Security Monitoring
SIEM Detection Rules | Brute-Force Detection | Port Scanning Detection | Suspicious DNS Detection | Firewall Connection Monitoring | VPN Brute-Force Detection | Phishing Detection | IOC Analysis | Alert Investigation | Log Correlation

Security Operations
Wazuh | Splunk | Elastic Stack | SIEM Fundamentals | SOC Operations | Security Monitoring | Log Analysis | Alert Triage | Incident Detection | Incident Response | Threat Detection | Windows Event Log Analysis | Linux Log Analysis | IOC Analysis | SOAR

Security Tools & Concepts
Nmap | Burp Suite | Cisco Packet Tracer | MITRE ATT&CK | CIS Controls | CIS Security Benchmarks | Vulnerability Management | CVE Analysis | Port Scanning | Web Application Security | Cybersecurity CTF

Endpoint / Security Management
Sophos | ManageEngine | EDR Fundamentals | Endpoint Monitoring | File Integrity Monitoring (FIM) | Security Configuration Assessment (SCA)

Cloud / AWS Security
AWS CloudTrail | AWS IAM Fundamentals | AWS Security Groups | AWS VPC Flow Logs | AWS-based Wazuh Deployment

Projects

Project 1: AI-Assisted SOC Attack Story Reconstruction & Risk Intelligence
- Reconstructed attack timelines using security alerts and log events.
- Correlated events and mapped attacker activities to **MITRE ATT&CK** techniques.
- Analyzed attack behavior, affected assets, indicators, and severity.
- Generated incident summaries to support **L1 SOC alert triage and investigation**.

Project 2: Blocked IP Checker

- Developed a Blocked IP Checker to identify and verify blocked or restricted IP addresses.
- Implemented IP validation and status checking features to improve network monitoring and security awareness.

Applied Skills

- Monitored and analyzed network traffic patterns using Nmap for basic threat and vulnerability awareness.
- Performed web application vulnerability assessment using Burp Suite, identifying common security weaknesses.
- Simulated network environments and security configurations using Cisco Packet Tracer for SOC-relevant scenarios.
- Applied SOC fundamentals — log analysis, alert triage basics, and incident response concepts — through coursework and self-study.
- Studied attacker tactics and techniques using the MITRE ATT&CK framework to understand threat detection patterns.

Certifications

Fortinet NSE 1 – Cybersecurity and Cloud Fundamentals
Fortinet Training Institute | 2026

NPTEL – Java Programming

Strengths

- Attention to Detail
- Analytical & Critical Thinking
- Problem Solving under Pressure
- Team Collaboration
- Quick Learner

Education

Bachelor of Engineering (B.E.), Sri Shanmugha College of Engineering and Technology 2027
