Education

Panimalar Engineering College **2022 – 2026**
B.Tech - Artificial Intelligence and Data Science *CGPA:7.61*
HSC **2021 – 2022**
Shri Vinayaga Hr Sec School *53.6%*
SSLC **2019 – 2020**
Vidyaa Vikas Matric Hr Sec School *57.8%*

Technical Skills

Languages: Java, SQL, Python, C, HTML.
Developer Tools: VS Code, Eclipse, Power BI, MS Excel
Libraries/Frameworks: TensorFlow, Pandas, NumPy, OpenCV
Databases: MySQL

Projects

Animal-Vehicle Collision Avoidance System Using Computer Vision | *Python, OpenCV, HOG*

- Developed a computer vision-based driver assistance system to detect animals on roads in real time and generate collision warning alerts.
- Implemented animal detection and distance estimation using HOG features and a boosted cascade classifier, improving road safety by helping drivers avoid animal-vehicle collisions.

Skin Cancer detection using EfficientNet | *Python, TensorFlow, flask*

- Developed a deep learning model using EfficientNet to classify skin lesions, achieving high accuracy in distinguishing between malignant and benign cases.
- Implemented AI-driven feature extraction and classification on a dermatology image dataset to assist in early skin cancer detection.
- Explored potential applications of AI in healthcare, enhancing decision-making for dermatologists and improving patient outcomes.

AI Resume Analysis | *Python, NLP*

- Developed an AI-powered tool using NLP and deep learning to analyze resumes, score candidates, and provide automated feedback.
- Implemented job recommendations leveraging LinkedIn data and suggested relevant certifications for skill enhancement.
- Extracted and analyzed project details from portfolio websites to enhance candidates' profiles for job applications.

Internship

Company Name: TCS ION – Machine Learning Intern (Remote) **July 2024 – Oct 2024**
Project: Classification Model – Build a Model that Classifies the Side Effects of a Drug

- Developed a machine learning classification model to predict and classify drug side effects using Python and data analysis techniques.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy and support healthcare decision-making.

Certifications

- Data Science for Beginners (Gold Category) – NASSCOM FutureSkills Prime
- Augmented Reality Development and its Applications – TCS ION
- Oracle Data Platform 2025 Certified Foundations Associate– Oracle University

Publication

Personality Disorder Insights Highlighting the Focus on Mental Health Using Social Media

Developed Personality Disorder Insights Highlighting the Focus on Mental Health Using Social Media, The project focused on early detection of personality disorders using NLP techniques and a fine-tuned BERT model. Integrated an AI-powered chatbot for real-time mental health counselling based on social media text analysis.
