CAREER OBJECTIVE

A motivated Electronics and Communication Engineering graduate seeking an opportunity to apply my academic knowledge, hands-on project experience, and analytical skills in a dynamic work environment, while contributing to innovative engineering solutions and professional growth.

TECHNICAL PROJECT

WEEDX (Agricultural Robot Development)

- Worked on the development of an agricultural robot for weed detection and removal using ROS and STM Microcontroller.
- Applied Embedded Systems and Microcontroller concepts for robot control and automation.

Home automation using IoT

- Developed an IoT-based home automation solution to enable intelligent and remote control of electrical devices.
- Integrated mobile application connectivity for real-time monitoring and efficient appliance operation.

Academic Project

- Developed 20+ Embedded System Projects using microcontrollers, sensors, and interfacing modules.

EDUCATION

SSLC Government Girls Higher Secondary School - 2021
HSC Government Girls Higher Secondary School 68.5% -2023
B.E Electronics and Communication Engineering -7.84 CGPA

ADDITIONAL INFORMATION

- **Technical Skills:** C&Embedded C,Analog&Digital Electronics,Microcontroller-Arduino,STM32,Iot& Wireless Communication,Circuit Analysis.
- **Softs Skill**:Effective Communication & Team Collaboration,Time Management Professionalism and Strong Work ethic.
- **Certifications:** Awarded 3rd Prize in a Paper Presentation competition at a Technical Symposium.
- IEEE Student Membership Certification
- Successfully completed an Embedded Systems certification course from Udemy.

HOBBIES

- Creative Resin Artwork

DECLARATION

- I declare that the information presented in this resume is authentic and accurately represents my qualifications and achievements.
