KOWSIKA T

Electronics and Communication Engineering
9080541513 | kowsit2006@gmail.com | linkedin.com/in/kowsika-t3323

CAREER OBJECTIVE

Motivated ECE student with strong expertise in VLSI Design, RTL Design, Verilog HDL, Embedded Systems, and IoT. Completed 3 industry internships in VLSI, Data Analytics, and AI. Seeking a challenging role in digital design, RTL verification, or Embedded Systems Engineering.

ACADEMIC QUALIFICATION

B.E. Electronics and Communication Engineering | KSR Institute for Engineering and Technology, Anna University | Expected: 2027 | CGPA: 8.1/10

Higher Secondary Certificate (HSC) | Thanneerpandalpalayam State Board | 2023 | 72%

TECHNICAL SKILLS

Programming Languages: C, Python, Java
VLSI and Digital Design: Verilog HDL, RTL Design, Digital Verification, Logic Synthesis, Functional Simulation
Embedded Systems and IoT: Arduino, Embedded C, IoT, Raspberry Pi, ESP Boards, I2C Communication
Tools and Software: MATLAB, Xilinx Vivado, EDA Playground, VS Code, MS Excel
Web Technologies: HTML, CSS, JavaScript

INTERNSHIPS

VLSI Design Intern | Taras Company, Remote *February 2026 – Present*

- Developed 5+ digital circuit modules in Verilog HDL, improving simulation accuracy by 30%
- Executed RTL design, logic synthesis, and functional simulation using EDA Playground and Xilinx Vivado
- Delivered full VLSI design flow — specification to verified simulation — across 3 independent modules

Data Analytics Intern | Xplore IT Corp, Coimbatore *June 2025*

- Conducted thorough data analysis on 10+ structured datasets using MS Excel
- Created interactive dashboards and visual reports, boosting team decision-making efficiency by 40%

Artificial Intelligence Intern | Brainery Spot Technology, Coimbatore *July 2024*

- Built 3 Machine Learning classification models using Python, attaining 85% average accuracy
- Applied data preprocessing and feature engineering techniques, cutting model error rate by 20%

PROJECTS

Automatic Billing System using RFID | *Arduino Uno, RFID Module, Embedded C, IoT*

- Constructed a fully mechanized billing system that reduced manual billing time by 80%
- Tracked 50+ products instantly via RFID tags, eliminating manual entry errors and recording 98% billing accuracy

Color-Based Product Sorting System (Ongoing) | *Arduino Uno, TCS34725, Servo Motor, Embedded C, I2C*

- Engineered a computerized color-sorting system to classify 4 product categories on-the-fly
- Integrated TCS34725 sensor with servo motor via I2C, attaining 95% accuracy; projected to cut labor by 60%

CERTIFICATIONS

- AI and Machine Learning Training Program – EduSkills Foundation (10 Weeks, 2024)
- NPTEL – Internet of Things – IIT Kharagpur | Elite + Silver | Score: 75% | 12 Weeks
- MATLAB Onramp – Signal Processing, Deep Learning, and Machine Learning (3 Modules)
- Value Added Courses – IoT Systems using Arduino, ESP Boards and Raspberry Pi; VLSI Design Fundamentals

PAPER PRESENTATIONS

- Performance Analysis of Ventilator using Fuzzy Logic – TECH FRONTIERS 2025, National Level Technical Symposium *March 2025*
- AI-Driven Drones with Thermal Imaging and UWB Radar for Rapid Rescue – INFEST 2K25, KSR College of Engineering *February 2025*

HACKATHONS AND WORKSHOPS

- Participated in Future X Hackathon – KSR College of Engineering *March 2025*
- Joined Smart 5G Antenna Workshop – Kongu Engineering College *August 2024*
- Attended Arduino Hands-on Training Workshop – KPR Institute of Engineering and Technology *September 2024*
- Finished Entrepreneurship Development Workshop – Bannari Amman Institute of Technology *October 2024*

LANGUAGES

Tamil, English
