PROFILE

Mechanical CAD Designer with strong skills in technical drawing, 2D/3D modeling, and design detailing for sheet metal and casting components. Proficient in CAD software and familiar with Teamcenter for design data management. Known for attention to detail, teamwork, and a strong commitment to accuracy and project timelines.

EXPERIENCE

GGS Engineering Services Private Limited - Chennai, India

Business Process Enabler / July 2024 – Dec 2025

As a business process enabler, I played a critical role in delivering the projects on time, monitoring, and maintaining the workflow for smooth operations.
Collected and analyzed process-related data to track performance, streamline operations, improve efficiency, and support organizational goals.
Work closely with business partners in the Product Groups department to understand their needs regarding the products.

Trainee Engineer / June 2023 – June 2024

As a detailer, my primary responsibility is to ensure the accuracy and completeness of technical drawings and specifications, playing a crucial role in the design and production process.
Collaborated with multidisciplinary teams to develop comprehensive models and their detailing for sheet metal components and castings, contributing to the successful execution of projects.
Utilizing CAD software to translate design concepts and specifications into detailed technical drawings.
Accurately dimensioning drawings and adding annotations to provide clarity and guidance to production teams.
