NAVEEN A

Full Stack Developer & AI/ML Engineer
naveenarul111@gmail.com | +91 9360500228

Career Objective

A motivated student seeking real-world exposure, with hands-on experience in full stack development and AI/ML systems, aiming to build impactful and scalable applications.

Education

B.Tech – Artificial Intelligence and Data Science **2023–2027**
Kongu Engineering College
CGPA: 8.39

Higher Secondary Education **2022–2023**
Adhiyaman Matric Higher Secondary School
12th: 93.5% | 11th: 92.1%

Skills

- **Languages:** Java, Python, C, SQL
- **Core CS:** Data Structures, Algorithms, OOP, DBMS, REST APIs
- **AI/ML:** NLP, RAG, OCR, Speech Recognition, Computer Vision, LLM APIs, LangChain
- **Backend:** Node.js, Express.js, FastAPI
- **Frontend:** React.js, HTML5, CSS3, JavaScript, TypeScript
- **Databases:** MongoDB, PostgreSQL, MySQL, Vector DB, MariaDB
- **Tools:** Git, Postman, Vercel, Netlify, Render, Docker, AWS Basics

Area of Interest

- AI-powered Full Stack Applications
- Retrieval-Augmented Generation (RAG) Systems
- Problem Solving and Data Structures
- Document Intelligence and OCR Pipelines
- Speech Recognition and Multimodal AI Systems

Internships

AI Intern — PunchBiz **June 2025–March 2026**

- Developed an AI-powered mock interview platform generating interview questions from resumes and domain inputs.
- Built FastAPI services integrating LLMs, STT, TTS, and automated answer evaluation for voice-based interview simulations.
- Implemented browser-based proctoring using COCO-SSD object detection to monitor anomalies.

Tech Stack: FastAPI, MySQL, COCO, Whisper, ElevenLabs, Docker

Full Stack AI Intern — Bharat Intelligence **Aug 2025–Oct 2025**

- Developed a location intelligence platform enabling business discovery through location, radius, and category-based searches.
- Integrated Google Places API to extract and process business details, addresses, coordinates, and related metadata from map-based queries.

Projects

SQLTalk — NLP to SQL with LLM Pipelines Live | GitHub

- Built a full-stack natural language interface that converts user questions into PostgreSQL queries using LLMs.
- Implemented a multi-layer SQL safety pipeline with read-only enforcement, keyword blocking, table allowlisting.
- Designed an analytics dashboard to display query results in tables and charts with execution-time feedback.
- **Tech Stack:** Node.js, Express.js, PostgreSQL, Axios

TriScan — AI Document Analysis System Live | GitHub

- Built an AI document platform for OCR, web extraction, and multi-file comparison across PDF, DOCX, TXT, and image inputs.
- Developed preprocessing pipelines to extract and organize unstructured content for analysis and querying.
- Implemented component-wise grounded chat, enabling users to ask follow-up questions on results in a RAG-style workflow.
- **Tech Stack:** Node.js, Express.js, MongoDB, Tesseract.js, Cheerio, got-scraping, diff, fastest-levenshtein, Groq API

PerceptAI — Vision and Voice Intelligence System Live | GitHub

- Built a multimodal AI platform that detects objects in images and transforms them into structured scene summaries with contextual insights.
- Combined computer vision, NLP, and LLM reasoning to generate human-readable explanations from visual inputs.
- Implemented voice intelligence features including speech-to-text, transcript analysis, and text-to-speech for natural voice-based interaction.
- **Tech Stack:** FastAPI, YOLOv8, BERT, LLaMA 3.1 , ElevenLabs.

Certifications

Oracle Certified Professional: Java SE 17 Developer **2026**
Oracle Generative AI Professional **2025**
MongoDB Certified Associate Developer **2025**
