Venkata Ram Thotakura

I am fresher and have no work experience in any company. My short- term goal is to get placed in a reputed company like yours, which will allow me to enhance my skills and knowledge. My long-term goal would be to reach a higher position in your company.

EDUCATION

B. Tech
Vignan's Lara Institute of Technology & Science
05/2020 - 05/2024 *70%*

Class XII
Narayana junior College
06/2018 - 04/2020 *73%*

Class X
Zilla Parishad High School
06/2017 - 04/2018 *76%*

PROJECTS

1. **VLAN & STP(Virtual Local Area Network & Spanning Tree Protocol):**

- Configured and validated VLAN and Spanning Tree Protocol (STP) functionality in a multi-switch Cisco environment to ensure reliable Layer-2 communication and loop-free network operation.
- Tested VLAN access ports, trunk ports, VLAN tagging (802.1Q), MAC address learning, and end-to-end connectivity between hosts across multiple switches.
- Validated STP features including root bridge election, port roles/states, blocking ports, BPDU exchange, topology changes, and convergence behaviour.
- **Roles and Responsibilities –** Performed packet-level analysis using Wireshark to monitor Ethernet frames, VLAN traffic, BPDU packets, and Layer-2 communication flow.

2. **Open Shortest Path First (OSPF)**

- This project is about configured and **validate OSPF** routing between interconnected routers to ensure proper neighbor adjacency and route exchange.
- Tested OSPF functionality including neighbor formation, route propagation, SPF calculations, and verification of different LSA types exchanged between routers.
- Developed basic automation scripts using Python and PyTest to reduce manual testing effort and improve test execution efficiency.
- **Roles and Responsibilities –** Performed packet-level analysis using Wireshark to monitor OSPF Hello packets, DBD packets, LSA updates, and adjacency establishment process.

3. **Dynamic Host Configuration Protocol (DHCP)**

- This project is about Dynamic Host Configuration Protocol which I tested the DORA process is happening in between the client and DHCP Server. I observed the packet flow in the Wireshark and seen the ethernet, ARP, Discover, Offer, Request, Acknowledgement packets.
- **Roles and Responsibilities –** Test the DHCP server is providing dynamic ip addresses to the clients. Developed basic Scripting using Python & Pytest.

INTERNSHIPS

Intechfy Solutions
Project Trainee

Roles & Responsibilities:
Performed Layer-2 and Layer-3 protocol testing for enterprise networking & ensuring a seamless customer experience about their requirements and company's approach

SKILLS

- Python
- Networking Protocols
- Data transfer from one layer to another layer in OSI and TCP/IP models
- Manual Testing
- Automation Testing using Python
- Python Scripting
- Knowledge on OOPS

CERTIFICATIONS

- Python Programming in Hacker Rank
- NPTEL on cloud computing

LANGUAGES KNOWN

English
Professional Working Proficiency

Telugu
Full Professional Proficiency

INTERESTS

Badminton

WORKSHOPS

- Participated in IOT workshop.
