PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with a strong interest in Artificial Intelligence, Machine Learning, and Software Development. Currently learning Java, Python, Object-Oriented Programming (OOP), and Data Structures while strengthening problem-solving skills. Developed AI-based projects including Plant Disease Analysis and Classification System and AI-Based Facial Music Recommendation System. Passionate about building intelligent solutions that solve real-world problems.

EDUCATION

Kongunadu College of Engineering and Technology Expected 2027

B.Tech Artificial Intelligence and Data Science (CGPA: 6.86 / 10)

TECHNICAL SKILLS

Programming Languages:	Java
Web Technologies:	HTML, CSS, JavaScript
AI/ML:	Machine Learning Fundamentals, Computer Vision
Tools:	GitHub, VS Code, MS Excel
Core Concepts:	OOP, DBMS Fundamentals

PROJECTS

Plant Disease Analysis and Classification System 2024

- Developed an AI-based system to identify and classify plant diseases from leaf images.
- Applied image processing techniques for disease detection and classification.
- Performed preprocessing and feature extraction to improve model accuracy.
- Designed a solution to support early disease diagnosis and crop health monitoring.

AI-Based Facial Music Recommendation System 2025

- Developed an intelligent music recommendation system based on facial emotion recognition.
- Utilized computer vision techniques to detect user emotions in real time.
- Mapped emotions to personalized music recommendations.
- Improved user experience through mood-based music suggestions.

INTERNSHIP EXPERIENCE

Full Stack Development Intern 2024

- Developed responsive web applications using HTML, CSS, JavaScript and backend technologies.
- Worked on frontend and backend integration for dynamic web applications.
- Collaborated on implementing user-friendly interfaces and application features.

Machine Learning Intern 2025

- Worked on machine learning concepts including data preprocessing, model training and evaluation.
- Performed data analysis and visualization using Python libraries.
- Gained hands-on experience implementing machine learning algorithms on real-world datasets.

CERTIFICATIONS

- Java Programming
- Python for Data Science

ACHIEVEMENTS

- Won 1st Prize in Project Expo at Vel Tech.
- Built AI-based academic projects using Machine Learning concepts.
- Participated in technical workshops, coding events and hackathons.
