MIDHUN RAMESH

Cybersecurity Fresher | SOC Analyst | SIEM & Security Monitoring

midhunramesh@gmail.com | +91 9384329650 | Tamil Nadu, India | linkedin.com/in/midhun-ramesh-5002432a5

PROFESSIONAL SUMMARY

Cybersecurity undergraduate with hands-on lab exposure in SIEM, log monitoring, and alert analysis using Wazuh. Experienced in Windows endpoint monitoring, network security analysis with Wireshark and Nmap, and AWS cloud security fundamentals including IAM, CloudTrail, and CloudWatch. Familiar with Sophos, ManageEngine, VPN monitoring, and basic MITRE ATT&CK concepts through practical lab work. Seeking an entry-level SOC Analyst / Security Analyst role.

TECHNICAL SKILLS

- **SIEM & Detection:** SIEM, Log Monitoring, Alert Analysis, Incident Detection, Incident Response Basics, Threat Intelligence Basics
- **Security Operations:** MITRE ATT&CK Basics, Phishing Analysis, Vulnerability Assessment Basics, EDR, Firewall, IDS/IPS
- **Security Tools:** Wazuh, Sophos, ManageEngine, Wireshark, Nmap, OpenVPN, Zeek, Suricata, Kali Linux, Metasploitable 2
- **Cloud Security (AWS):** EC2, IAM, S3, VPC, CloudWatch, CloudTrail, SNS, Security Groups, Internet Gateway, NAT Gateway Basics
- **Networking:** OSI Model, TCP/IP, IP Addressing, Subnetting Basics, DNS, VPN, Ports, Public vs Private Subnets
- **Operating Systems:** Windows Fundamentals, Linux Fundamentals, Windows Event Viewer, PowerShell Basics, CMD, Linux Commands
- **Programming / Scripting:** Python (Basic), Bash (Basic), PowerShell (Basic)

HANDS-ON CYBERSECURITY

- **Wazuh SIEM:** Set up a Wazuh Manager on Ubuntu EC2, integrated a Windows endpoint via the Wazuh agent, configured log collection, and practiced alert investigation using JSON-based security logs.
- **Sophos:** Practiced endpoint security monitoring and worked with Sophos security controls in a lab environment.
- **ManageEngine:** Practiced endpoint security and security management using ManageEngine in a lab environment.
- **Linux & Network Security:** Practiced Ubuntu Linux administration, analyzed network traffic using Wireshark, and performed port/service scanning with Nmap.
- **AWS Cloud Security:** Worked with EC2, IAM, S3, and VPC; configured CloudTrail logging with CloudWatch monitoring and SNS notifications.
- **OpenVPN:** Set up and practiced OpenVPN Access Server, connected VPN clients, and reviewed VPN logs to understand VPN-related security events.

PROJECTS

Network Threat Detection & Investigation Lab

Technologies: *Kali Linux, Metasploitable 2, Zeek, Suricata, Wireshark, Nmap, MITRE ATT&CK*

Built a controlled network security lab to simulate, detect, and investigate network service scanning activity using open-source monitoring and detection tools.

- Built a controlled network security lab using Kali Linux and Metasploitable 2 to simulate and investigate network service scanning activity.
- Generated Nmap scanning traffic and analyzed network connections using Zeek, including connection states and destination ports from conn.log.
- Configured Suricata IDS to monitor network traffic and investigated Nmap-related detection alerts.
- Used Wireshark to perform packet-level analysis of SYN, SYN-ACK, and RST traffic and mapped the observed scanning behavior to MITRE ATT&CK T1046 – Network Service Scanning.

Web Server Attack Investigation & VAPT Lab

Technologies: *Kali Linux, Apache, DVWA, Splunk, curl, tcpdump, MariaDB, VirtualBox*

Built a controlled web security lab using Kali Linux, Apache, DVWA, and Splunk to monitor and investigate web application activity.

- Configured Apache access logs for Splunk ingestion and analyzed HTTP requests, source IPs, response codes, and request patterns.
- Integrated DVWA as an intentionally vulnerable application for authorized vulnerability assessment and security testing.
- Used curl, browser requests, and tcpdump to validate HTTP traffic and correlate network activity with Apache logs.
- Built a SOC-style investigation workflow connecting VAPT activity → Apache/DVWA → logs → Splunk → security investigation.

EDUCATION

B.E., Computer Science and Engineering (Cyber Security) — Expected 2027

Sri Shanmugha College of Engineering and Technology | CGPA: 7.10

Higher Secondary Certificate (12th) — 65% — 2023

Govt Boys Higher Secondary School, Tiruchengode

CERTIFICATIONS

- TCM Security — Linux 100 Fundamentals (L100)
