PROJECT

Automated Testing Framework for OrangeHRM Web Application

Technologies: Java, Selenium WebDriver, TestNG, MySQL, Eclipse, Maven

- Developed an end-to-end automation testing framework for the OrangeHRM web application using Selenium WebDriver and the Page Object Model (POM) design pattern to improve script reusability and maintainability.
- Automated core modules including Login, Employee Management, and Leave Management, reducing manual regression testing effort.
- Designed, executed, and maintained automation test scripts in Java using Selenium WebDriver and TestNG for functional validation of application modules.
- Performed manual functional and regression testing to validate application behavior and identify defects prior to automation.
- Used Maven for build management and Git for version control of the test automation codebase.
