Sobiya S

Namakkal, Tamil Nadu | +91-8610679399 | sobiya.sathya79@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of experience in software development and DevOps, with hands-on expertise in AWS cloud infrastructure, Kubernetes orchestration and CI/CD automation. Skilled in building scalable, secure and highly available systems using EKS, Helm, Terraform and Jenkins, with proactive monitoring and infrastructure-as-code practices. Has deployed and operated production AI and SaaS platforms for enterprise and government clients.

PROFESSIONAL EXPERIENCE

DevOps Engineer - CubeAI Solutions, Erode **April 2024 - Present**

Project: ESAA Platform - AI-Powered Knowledge and Document Intelligence Platform

- Provisioned and managed AWS EKS cluster including node groups, auto-scaling, OIDC provider and IAM roles for 20+ Kubernetes workloads.
- Built Jenkins CI/CD pipelines covering build, test, Docker image push to ECR and Helm-based Kubernetes deployments with versioned image tagging.
- Deployed 20+ microservices (API servers, Celery workers, ML model-serving pods) using Helm charts with zero-downtime rolling updates.
- Authored Terraform IaC modules for EKS, RDS, ElastiCache, VPC, IAM and ECR lifecycle policies.
- Maintained RDS PostgreSQL (automated backups, parameter tuning, IAM auth, storage auto-scaling) and ElastiCache Redis with failover for Celery task queuing.
- Monitored health with Prometheus, Grafana and CloudWatch: custom dashboards for API latency, pod health, node resources and Celery queue depth.
- Configured nginx-ingress, cert-manager, TLS certificates and Horizontal Pod Autoscaler for API servers and Celery workers.
- Implemented Kubernetes RBAC, network policies and ECR image scanning; resolved CrashLoopBackOff, OOMKilled and Pending pod failures via kubectl and CloudWatch.
- Optimized multi-stage Dockerfiles for backend, web, model server and code interpreter, reducing image sizes through layer caching.
- Deployed 10+ SaaS websites on AWS using Docker, EC2 and automated CI/CD pipelines with zero-downtime rollouts.

Project: TN Health AI - Government of Tamil Nadu Health and Family Welfare Department AI Platform

- Deployed and managed the bilingual (Tamil/English) health portal covering citizen services, AI health assistant and staff login on AWS with Docker and automated CI/CD pipelines.
- Configured domains, HTTPS/TLS certificates and zero-downtime rollouts to keep the public-facing portal secure and highly available.
- Set up Prometheus, Grafana and CloudWatch monitoring for application health, resource usage and alerting.

Project: Silent Sepsis Guardian (GetWell) - Clinical AI Platform for Early Sepsis Detection

- Deployed and managed the clinical monitoring platform with secure email and Google sign-in on AWS using Docker and automated CI/CD pipelines.
- Configured HTTPS/TLS, secrets management and access controls to protect sensitive healthcare workloads.
- Implemented monitoring and log analysis with Prometheus, Grafana and CloudWatch to ensure reliability and quick incident resolution.

Full Stack Development Intern - Fintechgie (College Internship) **2nd and 3rd year of college**

- Built responsive frontend components and assisted in backend API development and database schema design for fintech client projects.

TECHNICAL SKILLS

Cloud Platform	Amazon Web Services - EKS, RDS, ElastiCache, ECR, EC2, VPC, IAM, S3, CloudWatch, NAT Gateway
Container Orchestration	Kubernetes, Helm, kubectl, HPA, PersistentVolumeClaims, nginx-ingress, cert-manager
CI/CD and Automation	Jenkins, Docker, Dockerfile optimization, Helm upgrade and rollback, image lifecycle management
Infrastructure as Code	Terraform - modular IaC for EKS, RDS, VPC, IAM, ElastiCache
Monitoring and Observability	Prometheus, Grafana, Amazon CloudWatch, alerting rules, liveness and readiness probes
Security	Kubernetes RBAC, Network Policies, ECR CVE scanning, TLS/SSL, Kubernetes Secrets management
Operating Systems	Linux
Scripting and Version Control	Bash, YAML, Git

SOFT SKILLS

- Collaborates across development, QA and infrastructure teams during deployments, incident resolution and releases.
- Strong problem-solver, quick learner, detail-oriented with well-documented, repeatable operational workflows.

EDUCATION

B.E. Electronics and Communication Engineering - Sri Shanmugha College of Engineering, 2024 (8.0 CGPA)
