SARITHA SAKTHIVEL

Salem, Tamil Nadu, India | +91 97894-88750 | sarithaasakthi@gmail.com | https://www.linkedin.com/in/saritha-sakthivel-445b49228/

PROFESSIONAL SUMMARY

Penetration Tester with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT) across **web, mobile, API, network, and Windows infrastructure environments,** including internal network reconnaissance and attacks. Skilled in vulnerability discovery, manual validation, exploitation, PoC development, risk assessment, and CVSS-rated remediation reporting. Strong foundation in secure application development, OWASP security practices, and core networking concepts.

CORE TECHNICAL SKILLS

Testing Domains: Web, Mobile & API Penetration Testing, Windows & Linux Security Testing, Active Directory, Internal Network Reconnaissance & Attacks

Security Tools: Burp Suite, Nmap, Nessus, OWASP ZAP, Metasploit, Hydra, SQLmap, JADX, Frida, MobSF, APKTool, reFlutter, Impacket

Standards & Reporting: CVSS 3.1, OWASP Top 10 / Mobile / API, MITRE ATT&CK, PoC documentation, remediation reporting

Scripting & Platforms: Python, Bash, PowerShell, SQL/MySQL, Kali Linux, Git.

Core Concepts: OSI and TCP/IP Model, Internet Protocols, Threat Modeling.

PROFESSIONAL EXPERIENCE

Innometrix Techub Pvt. Ltd. — **Salem, Tamil Nadu**

Penetration Tester — *Jun 2024 – Present*

- Performed **VAPT** across web applications, APIs, mobile applications, networks and Windows infrastructure, covering reconnaissance, attack-surface enumeration, vulnerability discovery, manual validation, controlled exploitation, PoC development, remediation reporting and retesting.
- Performed 4+ **Android application security testing** using static and dynamic analysis techniques, including source/code review with JADX/APKTool, runtime instrumentation with Frida/Objection, and analysis of application security controls such as **SSL/TLS certificate pinning, root detection and APK tampering**. API traffic interception and network-level analysis using reFlutter, custom Frida scripts, PCAPdroid and Wireshark**.**
- Conducted **web and API security testing** covering authentication and authorization controls, session management, input validation, file-upload security, JWT implementation, CSRF protections, security misconfigurations and business-logic/API access-control weaknesses; manually validated scanner findings using **Burp Suite** and HTTP request/response analysis.
- Independently identified **36 vulnerabilities**, during a **email-server assessment** for a CERT-In empanelment audit; assessed SMTP/IMAP security user-enumeration exposure and server-side vulnerabilities, and performed controlled exploitation of an identified **RCE** vulnerability using Metasploit to obtain a reverse shell.
- Contributed to a **CERT-In empanelment Windows infrastructure assessment**, identifying **40 vulnerabilities** through network/service enumeration, vulnerability assessment, configuration review and manual validation, followed by exploitation of confirmed findings and evidence collection.
- Conducted an on-site vulnerability assessment on a government portal as part of a PMU engagement, identifying CSRF vulnerabilities and misconfigurations. Coordinated between internal and development teams during the portal revamp, performing QA validation of functional and security fixes prior to release.

CERTIFICATIONS & TRAINING

- Certified Penetration Testing — Cyber Nerds Solutions (2025), covering 30+ vulnerability classes across web and mobile.
- Cyber Threat Management — Cisco (2023)
- Completed TryHackMe's Jr. Penetration Tester path actively progressing through Red Teamer’s Path.

EDUCATION

B.E. Electronics & Communication Engineering — Sri Shanmugha College of Engineering and Technology, Salem | 2020–2024 | CGPA: 8.4
