Full Stack Developer

B.Tech Artificial Intelligence and Machine Learning graduate with hands-on experience building full-stack web applications using **React.js, Node.js, Express.js, and MongoDB**. Strong foundation in **JavaScript, REST APIs, database management, and problem solving**, with **250+ problems solved on LeetCode**. Interested in developing scalable, responsive, and user-focused web applications.

Education

Kongu Engineering College — **CGPA: 8.15/10**
B.Tech – Artificial Intelligence and Machine Learning — *2022 – 2026*

Technical Skills

Languages	:	JavaScript, Python, Java, HTML5, CSS3
Frontend	:	React.js, HTML, CSS, JavaScript, Responsive Web Design
Backend	:	Node.js, Express.js, REST APIs
Databases	:	MongoDB, MySQL
Tools	:	Git, GitHub, VS Code, Postman
Core Concepts	:	OOP, Data Structures and Algorithms

Experience

Junior Developer Intern — Jan 2026 – May 2026
Endava — *India*

- Contributed to the frontend development of a **food delivery website** using **HTML, CSS, and JavaScript**.
- Developed responsive UI components, implemented frontend functionality using **JavaScript**, and collaborated with the development team to troubleshoot and improve user interface issues.

Projects

PetAdoptEasy – Pet Adoption Website — *React.js, Node.js, Express.js, MongoDB* — GitHub

- Developed a full-stack pet adoption platform using **React.js** for the frontend and **Node.js, Express.js, and MongoDB** for backend services and data management.
- Implemented pet listing, adoption workflows, user interactions, and database operations through **RESTful APIs**.

E-Commerce Website — *React.js, Node.js, Express.js, MongoDB* — GitHub

- Built a full-stack **e-commerce application** with a React.js frontend and Node.js/Express.js backend connected to MongoDB.
- Implemented product browsing, product management, user interactions, and backend API integration using **RESTful services**.

EmoNet – CNN-Based Facial Expression Analysis — *Python, TensorFlow, Keras, OpenCV, CNN* — GitHub

- Developed a facial expression recognition system using a **Convolutional Neural Network (CNN)** to classify human emotions from facial images.
- Built and trained the model using **TensorFlow and Keras**, using convolution, pooling, and activation layers for feature extraction and classification.

Certifications

- **MongoDB Certified Associate Developer**

Achievements

- Awarded **2nd prize in a 24-hour hackathon** for developing CheapMart, a cost-effective web scraping solution.
- Solved **250+ coding problems on LeetCode**, strengthening problem-solving skills in Data Structures and Algorithms.
