PROFESSIONAL SUMMARY

Computer Science and Technology undergraduate (2027 batch) with hands-on experience in Python, SQL, and data analytics gained through two data analytics internships and independent IoT and web development projects. Skilled in data cleaning, exploratory data analysis (EDA), data visualization, and relational database management, with industry certifications in Python, C++, and Data Analytics. Seeking a Data Analyst, Python Developer, or Software Engineer role to apply strong analytical thinking and programming fundamentals to real-world business problems.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++
- **Data Analytics:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Web Scraping, Statistical Analysis
- **Libraries:** Pandas, NumPy, Matplotlib
- **Web Development:** HTML, CSS, Flask, Django
- **Database:** SQL (Querying & Data Retrieval)
- **Tools & Platforms:** Git, GitHub, VS Code, Excel
- **Core Strengths:** Problem-Solving, Analytical Thinking, Team Collaboration, Adaptability, Time Management

INTERNSHIP EXPERIENCE

Data Analytics Intern — CodeAlpha (Remote) *Apr 2026 – May 2026*

- Performed Python-based web scraping to collect and structure raw datasets from web sources for downstream analysis
- Conducted Exploratory Data Analysis (EDA) using Pandas and NumPy to clean data and identify patterns, trends, and outliers
- Built data visualizations with Matplotlib to translate analytical findings into clear, stakeholder-ready charts and reports

Data Analytics Intern — Femtosoft Technologies (Offline) *May 2026 – Jun 2026*

- Wrote and optimized SQL queries against relational databases to retrieve and analyze structured business data.
- Executed CRUD operations and multi-table JOIN queries to support accurate data retrieval and reporting workflows.
- Cleaned and validated datasets to improve consistency and accuracy ahead of analysis, reducing manual data errors.

PROJECTS

LT Line Fault Detection Software *Python, IoT*

- Designed an IoT-based monitoring system using sensor data to detect power line faults in real time
- Implemented automated alerting and section-isolation logic to reduce dependency on manual fault detection

Smart Campus Navigation — Web Application *Python, HTML/CSS, Flask*

- Built a Flask-based web application enabling real-time campus navigation through interactive digital maps
- Integrated QR-code-based access to support quick, location-based tracking for users

Smart Electricity Complaint Management System *React, Python, Flask, MySQL*

- Developed a web application to register and track electricity complaints
- Implemented complaint status tracking and admin management for faster resolution
- Enabled role-based access for users and admins to streamline complaint registration and resolution

CERTIFICATIONS & TRAINING

- Python Programming Certification — Cybernaut Ed Tech Pvt. Ltd.
- C++ Programming Certification — Cybernaut Ed Tech Pvt. Ltd.
- National Workshop on Python for AI & Machine Learning — K.S.R. College of Engineering

EDUCATION

B.E., Computer Science and Technology *2023 – 2027*

Vivekanandha College of Engineering for Women (Autonomous) | CGPA: 7.1

ACHIEVEMENTS & PARTICIPATION

- Participated in Cyeyonz'25 National Level Symposium (Bannari Amman Institute of Technology) and Technovanza Symposium (Shree Venkateshwara Engineering College)
