PROFESSIONAL SUMMARY

Computer Science student with hands-on experience in Python, SQL, JavaScript, React, REST APIs and backend development. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS and software development, with experience in debugging, testing, data validation and database operations. Developed web-based applications using Flask, React and SQL databases, with exposure to enterprise application workflows through internship training. Passionate about programming and problem-solving, with strong collaboration and communication skills, seeking to contribute as a **Software Engineer** in a software development environment.

TECHNICAL SKILLS

Languages	Python, C, JavaScript, SQL, PL/SQL
Web Technologies	HTML5, CSS3, React JS
API & Backend	REST APIs, API Testing & Troubleshooting, Flask, Django, JSON, Authentication & Authorization
Core CS	Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Databases	MySQL, PostgreSQL, MongoDB, SQLite, Oracle
Cloud & DevOps	AWS, Docker, Kubernetes, GitHub Actions, Jenkins
Technical Support	Troubleshooting, Debugging, Root Cause Analysis, Error Analysis, Issue Resolution, Data Validation
Tools	Git, GitHub, Postman, VS Code
Testing	Unit Testing, Debugging
AI / ML	NumPy, Pandas, TensorFlow, PyTorch, Deep Learning, Model Training & Optimization
Software Practices	SDLC, Agile, Problem Solving

INTERNSHIP

Oracle & Finacle Training Intern — Fynesse Technologies *June 2026 – July 2026*

- Worked with Oracle Database and Finacle enterprise application workflows, gaining exposure to database-driven financial systems.
- Used Python and SQL-based data processing to analyse transaction datasets and identify data inconsistencies and suspicious patterns.
- Performed data validation, error analysis and result verification to support accurate processing and reliable reporting.

PROJECTS

AccessMap — Data-Driven Accessibility Platform

React JS, JavaScript, Flask, REST APIs, SQLite

- Developed a web application using React JS and Flask to collect, validate, store and retrieve accessibility information for public locations.
- Implemented REST APIs and SQL database operations for efficient data retrieval and filtering.
- Debugged application workflows and performed data validation and functional testing to improve application reliability.

Beyond Sight — Accessibility Platform

Python, Flask, OpenCV, SQL, HTML5, CSS3, JavaScript

- Developed a Python application to process educational visual content and generate accessible outputs.
- Implemented data processing and validation workflows to handle inconsistent inputs.
- Tested backend functionality and debugged application issues to maintain reliable data flow and system performance.

EDUCATION

Bachelor of Engineering, Computer Science and Technology *Expected 2027*

Vivekanandha College of Engineering for Women | CGPA: 7.5

Higher Secondary Education *2023*

SSM Lakshmi Ammal Matric Higher Secondary School

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place — Full Stack Hackathon, Cyberdrake
- The Complete SQL Bootcamp: Go from Zero to Hero — Udemy
- MongoDB & AI Data Strategy — Professional Credential
- Affective Computing — Course/Certification
