GOKUL KUPPUSAMY

Software Engineer — AI & Machine Learning Engineer — Python Developer

Erode, Tamil Nadu — +91 8122871414 — Gokulkuppusamy007@gmail.com

Professional Summary

B.Tech Artificial Intelligence and Data Science student skilled in Python, Machine Learning, NLP, and Full-Stack Web Development. Proficient in Data Structures and Algorithms, Object-Oriented Programming, Database Management (SQL), and Version Control (Git/GitHub), with hands-on experience following the Software Development Life Cycle (SDLC). Recognized as a Top 10 finalist in a national-level hackathon for building an AI-powered assistant application. Seeking an entry-level Software Engineer or AI/ML Engineer role to build innovative, data-driven solutions.

Education

AVS Engineering College, Salem **2023 – 2027 (Pursuing)**
Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science

Government Higher Secondary School, Veppadai **2021 – 2023**
Higher Secondary Certificate (HSC)

Vani Vidyalaya Matric Higher Secondary School, Uppupalayam **2019 – 2021**
Secondary School Leaving Certificate (SSLC)

Experience

IDM Tech Park **2024**
Web Development Intern – *Certification: Web Designing (15-Day Internship)*

- Completed a 15-day intensive certification covering HTML, CSS, and JavaScript for front-end web development.
- Built responsive web pages and reusable UI components optimized for 3 device breakpoints (desktop, tablet, and mobile), applying modern UI/UX design principles.
- Tested and refined web pages across 4 major browsers (Chrome, Firefox, Safari, Edge) to strengthen debugging and cross-browser compatibility skills.

Technical Skills

Programming Languages: Java, C, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, JavaScript, Responsive Web Design, REST APIs, UI/UX Design

AI / Machine Learning: Artificial Intelligence (AI), Machine Learning (ML), Deep Learning Fundamentals, Natural Language Processing (NLP), Data Analysis, Data Modeling, Model Development & Deployment

Tools & Platforms: Git, GitHub, VS Code, MySQL, Jupyter Notebook, Data Structures and Algorithms (DSA)

Concepts & Methodologies: Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Agile Methodology, Debugging, Problem Solving

Soft Skills: Leadership, Team Collaboration, Communication, Critical Thinking, Analytical Thinking, Time Management, Adaptability

Relevant Coursework

Data Structures & Algorithms — Artificial Intelligence — Machine Learning — Database Management Systems — Operating Systems — Computer Networks — Python Programming — Software Engineering

Projects

MAITRI – AI-Powered Offline Assistant for Astronauts *Python, Machine Learning, NLP*

- Developed an AI-powered offline assistant to support the psychological and physical well-being of astronauts during space missions.
- Engineered offline AI model deployment for mission-critical environments without internet connectivity.
- Applied machine learning and natural language processing concepts for health monitoring, guidance, and decision support.
- Recognized among **Top 10 projects** in a national-level hackathon for innovation in AI-driven healthcare solutions.

Travel Booking Landing Page *HTML, CSS, JavaScript*

- Developed a responsive travel booking landing page using HTML, CSS, and JavaScript.
- Designed an intuitive user interface with UI/UX best practices, showcasing destinations, tour packages, and booking workflows.
- Implemented mobile-friendly, cross-device responsive design for enhanced user experience.
- Built reusable, well-structured front-end components following clean code practices.

Achievements

- **Top 10 Finalist – HackIndia National-Level Hackathon 2026**, conducted by Muthayammal Engineering College.
- Selected among the **Top 10 projects in Round 2** for **MAITRI**, an AI-powered offline assistant for astronaut well-being.
