PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in Python, Java, SQL, React.js, FastAPI, and Machine Learning. Experienced in developing AI/ML applications, REST APIs, responsive web applications, and data-driven solutions through academic projects and industry internships. Strong foundation in data preprocessing, feature engineering, classification, regression, and software development.

TECHNICAL SKILLS

Programming: Python, Java, SQL
Machine Learning: TensorFlow, Keras, Scikit-learn, CNN, Classification, Regression
Web Development: HTML, CSS, JavaScript (ES6+), React.js, FastAPI
Tools & Platforms: Git, GitHub, VS Code

EDUCATION

K.S.R College of Engineering, Tiruchengode *2023 – 2027*
B.E. Computer Science and Engineering **CGPA: 7.7/10**

Govt Girls Hr. Sec School, Tiruchengode *March 2022*
87%

S.P.B High School, Pallipalaiyam *March 2021*
100%

PROJECTS

DermaVision – Skin Disease Classification *AI/ML Project*

- Developed an AI-powered skin disease classification application using **Python, TensorFlow, and Keras CNN** on the **HAM10000** dataset containing 10,015 dermatology images across 7 skin lesion classes.
- Implemented **image preprocessing** and **multi-class classification** to predict 7 skin lesion categories from uploaded images.
- Integrated a **FastAPI REST API** for model inference with a responsive **React** frontend for image-based predictions.

VoiceSync – Podcast Script to Audio Generator *Full-Stack Web Application*

- Engineered a responsive **React.js** interface for script input, podcast generation, and audio playback workflows.
- Built interactive frontend components using **TypeScript, Vite, and Tailwind CSS** to improve application responsiveness and usability.
- Integrated **Supabase and FastAPI** as part of an end-to-end web application for content and backend functionality.

Currency Converter *Web Application*

- Created a responsive currency conversion application using **HTML, CSS, and JavaScript** for real-time calculations.
- Implemented reliable conversion logic and a clean user interface with emphasis on usability and accuracy.

INTERNSHIPS

GenAI Intern – Oneyes Info Tech Solutions *June 2025*

- Developed interactive frontend components and dynamic web features for modern applications.
- Enhanced application functionality and responsive user interfaces to improve overall usability.

AI & ML Intern – TANSAM *July 2024*

- Trained and evaluated Machine Learning models using **classification and regression** algorithms.
- Performed **data preprocessing and feature engineering** to improve model performance and data quality.
