

ASHAN MOHAMED A

VLSI DESIGNER

Location: Kumbakonam, Thanjavur, Tamil Nadu | Email: ashanmohamed545@gmail.com

Phone: +91 8122430052 | LinkedIn: LinkedIn - Ashan | EDA: EDA Playground - Ashan

CAREER OBJECTIVE

Aspiring VLSI Design Engineer with a strong hands-on experience in Embedded Systems, IoT, AI-based sensor projects, and a growing specialization in VLSI design and verification. Skilled in Digital Electronics, Verilog, and currently expanding expertise in SystemVerilog, with a strong interest in RTL design, functional verification, and hardware development. Seeking internship and job opportunities in the VLSI Design where I can apply my knowledge in digital design and real-time problems to develop impactful, efficient, and real-world hardware solutions.

EDUCATION

Qualification	Institution	Year	Score
B.E. Electronics and Communication Engineering	Kongunadu College of Engineering and Technology, Trichy	2026 - Present	CGPA 78%
HSC	Christ the King Matric. Hr. Sec. School, Kumbakonam	2023	76%
SSLC	Christ the King Matric. Hr Sec. School, Kumbakonam	2021	All Pass

INTERNSHIP

1. **PCB Design – Yugam Innovations, Coimbatore** **15 days**

   Focused on PCB design using Autodesk EAGLE software with practical exposure to electronic circuit design. Developed skills in schematic capture, PCB layout design, routing, and design validation for printed circuit boards.

2. **VLSI [Design & Verification] - Univision, Chennai** **1 Month**

   Learned about Verilog HDL and SystemVerilog & UVM basics

TECHNICAL SKILLS

- Digital Electronics
- **Programming Languages:** C
- **Hardware Description Language:** Verilog, SystemVerilog basics
- **Tools & Platforms:** Cadence [NC-Launch, Genus, SoC Encounter, Virtuoso], Vivado, ModelSim, LTSpice and EDA Playground

PROJECTS

Project-1:

Title: Smart Vehicle Attendance System for Campus Transport

Tools Used: Open CV, Tessart OCR, React.js, Flask, NPM, Mongo DB, HTML, Javascript, NumPy.

Description: Developed a Smart Vehicle Attendance System for Campus Transport using AI-powered camera and OCR to automatically detect vehicles and extract license plate numbers in real time and it make Vehicle Logs.

Project-2:

Title: Auto-Calibrating Tank Refill Intelligence And Anti-Overflow Touchless Water Tap

Tools Used: Arduino Mega 2560, AJ-SR04M Sensor, Solenoid Valve, Submersible Pump, 2-Channel Opto-Coupled Relay Module, LM298 Voltage Regulator.

Description: Built an intelligent water management system featuring touchless tap control, anti-overflow protection, and automated tank refill monitoring.

CERTIFICATIONS

- ✓ PCB – Value Added Course
- ✓ NPTEL Certification – Introduction to Internet of Things (2025) of 72% Score.
- ✓ NPTEL Certification – Computer Architecture (2025) of 60% Score.
- ✓ Certificate for Completion of C Training – Spoken Tutorial Project, IIT Bombay.
- ✓ Secured First Class in English Senior Typewriting.

HACKATHONS, ACHIEVEMENTS & PRESENTATIONS

- Participated in Hackathon conducted by ***India International Science Festival [IISF]*** on ***Dec 6th – 9th*** at ***Haryana.***

  Project Title: *"Personalized AI-Powered Diagnostic Companion for Medical Imaging and Predictive Healthcare".*

- Awarded Best Innovation Prize at Sri Eshwar College of Engineering in Paper Presentation for "AI-Enhanced Irrigation for Terrestrial Farming".

- Participated in Hackathons at Smart India Hackathon, MSME 4.0 & 5.0, Teliport Season 3 organized by Tata Elxsi.

AREA OF INTERESTS

- ❖ VLSI - Design
- ❖ Embedded Systems
- ❖ Internet of Things (IoT)
- ❖ PCB Design

HOBBIES

- ➢ Research and Innovation
- ➢ Drawings

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge.
