PROJECTS

Driver Monitoring System – AI & ML

- Developed a driver monitoring system using AI/ML concepts to identify driver fatigue and unsafe driving behavior. The system focuses on monitoring driver conditions and applying intelligent detection techniques to support safer driving practices. **Power Monitoring System – IoT**
- Developed an IoT-based power monitoring system using ESP32 and a PZEM sensor for monitoring electrical parameters. The project involved sensor-based data collection and provided practical experience in IoT systems and continuous power monitoring.

Electrician Billing Software – Full Stack

- Built an electrician billing application using React, Node.js, and Postman for frontend development and API testing. The project provided practical experience in full stack web development, backend integration, billing application development, and API testing.

INTERNSHIP

HumbleTree Pvt Ltd, Coimbatore – Full Stack Web Development

- Completed a summer internship from June 12, 2025 to July 5, 2025, gaining practical exposure to full stack web development.

LEADERSHIP & CO-CURRICULAR ACTIVITIES
