SATHYANARAYANAN RC

Namakkal, India | +91 7373046996 | sathyanarayananrc26@gmail.com

SUMMARY

Motivated and detail-oriented Mechatronics Engineering student with a strong interest in industrial automation, designing, embedded systems, robotics, drone technology and IoT. Intermediate in PLC programming, Arduino, Designing and Drone technology with hands-on experience gained through academic projects and internships. Possess a solid foundation in control systems, sensor integration, and automation technologies. Passionate about learning emerging technologies in Industry 4.0 and developing innovative engineering solutions while continuously enhancing technical and problem-solving skills.

EDUCATION

B.E (MCT) : CGPA : 9.18, *K.S.Rangasamy College of Technology (Autonomous)* 2023 - 2027 | Tiruchengode

HSC : Percentage : 83, *Mahadeva Vidhyalayam Higher Sec School* 03/2023 | Tiruchengode

SSLC : Percentage : All pass , *Mahadeva Vidhyalayam Higher Sec School* 03/2021 | Tiruchengode

PROJECTS

Dual – use Piezo in Power Looms (MSME 4.0)

- This Project shows how Piezo can damp the loom sound while working and generate the vibration into useful electrical energy for small applications within loom.

Tire – Powered SpinCharge

- This Project shows how Piezo can absorb the vibration generated from tire and generate it into useful electrical energy and be used within the vehicle's small electrical applications.

IOT based Smart Aquarium Monitoring System

- This project minimizes manual intervention, enhances safety and well – being aquatic life and provides remote access control through user – friendly interface.

MATHPOP (SIH)

- Mathpop turns common counting toys into an intelligent, entertaining system that can be used as play based learning to teach math.

INTERNSHIP

Avian Aerospace Pvt Ltd March 2026 (4 Weeks)

- I received practical training in avionics engineering with hands-on experience in drone calibration, flight control, and UAV system operations. Gained exposure to testing, validation, and autonomous drone concepts in aerospace applications.

EduSkills – EV Design & Simulation May 2026 (2 Weeks)

- The internship aims to foster proficiency in the EV system domain, enabling me to become expect in this field.

CERTIFICATIONS

Successfully completed an internship in the Avionics Engineer in 2026 offered by Avian Aerospace.

Successfully completed a Virtual Internship in EV Design & Simulation in 2026 offered by EduSkills.

WORKSHOPS

Workshop on Deep Learning and Neutral Networking 03/2024
- Conducted by Karpagam Institute of Technology

Workshop on Robotics Process Automation 03/2024
- Conducted by Karpagam Institute of Technology

Workshop on Robotics Manipulator 03/2025
- Conducted by Kongu Engineering

SKILLS

AutoCAD (Intermediate) | **PLC** (Intermediate) | **SolidWorks** (Intermediate)

Drone (Intermediate) | **Manufacturing Automation** (Intermediate)

LANGUAGES

Tamil (Highly Proficient) | **English** (Highly Proficient)

HOBBIES

- Reading Books
- Cricket
