CAREER OBJECTIVE

Final-year B.E. Electronics and Communication Engineering student at Vivekanandha College of Engineering for Women, with hands-on experience in embedded systems, data analytics, and AI-driven projects. Seeking an entry-level role in Embedded Systems, Data Analytics, or Software Development to apply technical skills to real-world engineering problems and grow as a technology professional.

EDUCATION

Vivekanandha College of Engineering for Women — B.E. ECE, CGPA: 7.1 *2023 – Present*

Kongu Kalvi Nilayam Matric Hr. Sec. School — HSC (76%) *2022 – 2023*

Christhu Jyothi Matric Hr. Sec. School — SSLC *2020 – 2021*

TECHNICAL SKILLS

Programming Languages: Python, C++
Core Skills: Arduino, Embedded Systems, IoT
Data Analytics: Microsoft Excel, Power BI, Tableau
Tools: Arduino IDE
Additional: Problem Solving, Debugging

INTERNSHIP EXPERIENCE

Data Analytics Intern — Adventure Technologies *Jun 2026 – Jul 2026*

- Analyzed real-world datasets using Microsoft Excel, Power BI, and Tableau to derive actionable insights.
- Built interactive dashboards to visualize key trends and support data-driven decision-making.
- Strengthened analytical and problem-solving skills through practical projects and business case studies.

Embedded Systems Intern — Caliber Embedded Technology, Salem, TN *Jan 2025*

- Gained hands-on experience with C programming and core embedded systems concepts.
- Worked with microcontrollers to implement basic embedded programming logic.

Full Stack Development Intern — SDLC Web Dev. Technologies, Namakkal, TN *Jun 2025*

- Learned Python programming fundamentals as part of the full-stack development lifecycle.
- Gained introductory exposure to full-stack development concepts and workflow.

PROJECT

Arduino-Based Intelligent Wild Animal Alert System *2025 – 2026*

- Built an AI-powered wild animal detection and alert system using YOLOv5 for real-time identification.
- Integrated Arduino for hardware control, Twilio API for SMS alerts, and pyttsx3 for voice notifications to improve safety in forest and rural areas.

Technologies Used: Python, YOLOv5, Arduino IDE, Twilio API, pyttsx3

CERTIFICATIONS

- IBM SkillsBuild — Generative AI Related Course, 2026
- Bajaj Manufacturing System — Bajaj Auto Ltd, 2026
- Embedded Systems — CALIBER Embedded Technology
