MONISA V

(+91) 87789 68730 | monisavaratharaj@gmail.com | Chennai, Tamil Nadu, India 600044 | LinkedIn | GitHub

CAREER OBJECTIVE

Recent B.Tech Information Technology graduate with strong programming skills and a solid foundation in Computer Science fundamentals. Passionate about building reliable software solutions, solving complex technical challenges, and eager to learn new technologies.

EDUCATION

Madras Institute of Technology, Anna University — B.Tech in IT | CGPA: 8.85 Aug 2022 – April 2026

Reliance Matric Higher Secondary School — HSE | Score: 98.83% June 2020 – May 2022

TECHNICAL SKILLS

- Languages: Python, C, C++, Java
- Frontend: HTML, CSS, JavaScript
- Backend & APIs: Flask, PHP
- Databases: SQL (MySQL, Oracle), NoSQL (MongoDB)
- Tools: Git, GitHub, VS Code
- Operating Systems: Linux, Windows
- AI/ML : Deep Learning, Computer Vision, AI-Assisted Development, Prompt Engineering

PROJECTS

Bird Species Identification & Classification | Deep Learning & Computer Vision

Python · PyTorch · TensorFlow · Object Detection · Image Classification

- Engineered an ensemble deep learning system combining YOLOv8, ResNet-50, DenseNet-121, and MobileNetV2 for image-based bird species classification, achieving 75–80% validation accuracy.
- Optimized final predictions using majority voting with confidence score-based tie-breaking; implemented HDBSCAN for audio-based bird vocalization clustering and grammar mapping.
- Deployed the application on Hugging Face to provide an interactive interface for real-time bird species prediction.

SETC Bus Chatbot | Web Application & AI | Live Demo

Python · Flask · HTML · Typebot · Pandas · JSON · Render

- Built a Flask-based backend for bus route, schedule, and location information using CSV and JSON datasets.
- Integrated Typebot with the Flask application to provide an interactive bus information interface.
- Implemented fuzzy location matching and deployed the application on Render with a public live demo.

Online Voting System | Full Stack Web Application | Github repo

HTML · CSS · JavaScript · PHP · MySQL

- Developed a secure voting platform with PHP-based authentication, vote management, and result processing; integrated MySQL for reliable storage of voter and candidate records.

CORE CS & SOFTWARE ENGINEERING

- Object-Oriented Programming (OOP) · Data Structures & Algorithms (DSA) · Database Management Systems (DBMS) · Computer Networks · REST APIs · Software Development Life Cycle (SDLC)

CERTIFICATIONS

- FLY Scholar Certificate – CMI FFE | Web Development Fundamentals – IBM SkillsBuild | FFE Mentorship Program – Outstanding Mentee | AWS Cloud Computing intern at ElectroCloud Labs

ACHIEVEMENTS

- Finalist – TNYIEDP Hackathon | Finalist – Niral Thiruvizha 3.0 Hackathon | Aspiria Semi-Finalist

SOFT SKILLS

- Leadership · Teamwork · Problem Solving · Communication
