SUMMARY

B.E. Mechanical Engineering graduate (CEG, Anna University, 2026, CGPA: 6.76) with hands-on exposure to manufacturing processes and quality control systems through an internship at Steel Authority of India Limited. Proficient in AutoCAD, SolidWorks, and ANSYS, with project experience spanning materials characterization and embedded automation design. Seeking a Graduate Engineer Trainee role in manufacturing or quality to apply core mechanical fundamentals in a production environment.

EDUCATION

College of Engineering, Guindy — Anna University — Chennai, India
B.E. Mechanical Engineering — CGPA: 6.76 — Oct 2022 – May 2026

Shri Swami Matriculation Hr. Secondary School — Salem, India
12th Standard — 80.51% — 2019 – 2021

Sri Vidya Mandir Senior Secondary School — Salem, India
10th Standard — 67.2% — 2018 – 2019

INTERNSHIP EXPERIENCE

Steel Authority of India Limited — Salem, India
Intern — June 2024 – July 2024

- Observed hot rolling and cold rolling mill operations, gaining first-hand exposure to steel production workflow, plant safety protocols, and quality control practices across the rolling process.

PROJECTS

A Study on the Effect of Laser Shock Peening on the Thermal Properties of AA7075 Alloy (Group Project)

- Investigated the effect of Laser Shock Peening (LSP) on AA7075 aluminium alloy using Vickers microhardness testing, tensile testing, SEM, and DOE/RSM-based process parameter optimization.
- Achieved a 60% increase in surface hardness (176→281 Hv), 19% increase in tensile strength (539→643 MPa), and 71% reduction in specific wear rate, while improving corrosion resistance and reducing thermal expansion (CTE) at elevated temperature.

Design and Fabrication of Smart Poultry Cage

- Designed and built a functional prototype of an Arduino-based automated poultry cage with sensor-controlled feed dispensing, automatic water supply, and temperature monitoring.
- Validated all subsystems under simulated working conditions — a cost-effective automation concept to reduce feed loss and improve hygiene for small-scale farmers.

TECHNICAL SKILLS

Design & Simulation: AutoCAD, SolidWorks, Creo, ANSYS

Manufacturing & Quality: Process Optimization, Quality Control Systems, Root Cause Analysis

CLUB ACTIVITIES

Madhavam Tamil Literature Club

- Worked as an HR by assigning tasks, maintaining discipline, and ensuring smooth team coordination.

Rotaract Club (2024 – 2025)

- Worked as a Documentation Head, managing all event records.

SOFT SKILLS

Adaptability, Self-Disciplined, Work Ethic, Teamwork, Time Management

AREAS OF INTEREST

Manufacturing Technology, Strength of Materials
