VIGNESH R

JUNIOR ANALYST

+91 8525825985 | rvignesh732005@gmail.com | linkedin.com/in/vignesh-r-0031ba262

PROFESSIONAL SUMMARY

Results-driven and analytical Data Analyst Aspirant with hands-on expertise in Python, SQL, Power BI, Tableau, and Advanced Excel for data analysis, business intelligence solutions, and automated KPI reporting. Skilled in executing end-to-end ETL pipelines, data cleaning, statistical evaluation, and translating raw multi-source datasets into high-impact actionable insights. Proven ability to handle 10,000+ transactional records, optimize operational workflows, and engineer dynamic interactive dashboards that facilitate data-driven corporate decision-making.

TECHNICAL SKILLS

- Business Intelligence: Power BI (DAX, Power Query), Tableau, Dashboard Development, Data Visualization, Data Storytelling
- Database Management: SQL (MySQL, Joins, CTEs, Window Functions, Subqueries), DBMS, Data Validation & Profiling
- Programming & Libraries: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Predictive Analytics
- Data Engineering & Core Excel: ETL Pipelines, Data Modeling, Data Warehousing, Pivot Tables, VLOOKUP, XLOOKUP, Data Cleaning & Wrangling, Workflow Automation

PROFESSIONAL EXPERIENCE

Optimus Technology — Python Intern, Data Analytics (Remote) *Jul 2024 – Aug 2024*

- Developed robust Python automation scripts using Pandas and NumPy to streamline structured/unstructured data extraction, automated cleaning, and preprocessing workflows.
- Performed data profiling, transformation, and complex schema validation to eliminate anomalies and significantly maximize data integrity.
- Optimized end-to-end ETL workflows and automated repetitive business reporting tasks, successfully reducing manual data processing cycle times by approximately 40%.
- Collaborated cross-functionally with data team members to maintain clean analytical documentation and support corporate decision-making metrics.

PROJECTS

PhonePe Customer Transaction Dashboard *Python, SQL, Power BI, ETL*

- Engineered a fully automated ETL pipeline processing 10,000+ financial transaction records for advanced business intelligence reporting.
- Analyzed geospatial digital payment datasets using SQL and Python to identify crucial transaction trends, regional macro-growth, and customer behavior patterns.
- Designed interactive Power BI dashboards featuring custom DAX measures, automated KPI reporting modules, and business performance tracking grids.

Customer Behavior & Market Segmentation *Python, Excel, Power BI*

- Analyzed consumer purchasing behavior and historical demographic datasets using Python and Power Query to isolate high-value market segments.
- Designed tailored executive dashboards visualizing customer lifetime metrics, sales trends, and cross-channel performance to drive strategic marketing insights.

Student Performance Analysis *Python, SQL, Tableau*

- Executed exploratory data analysis (EDA) and rigorous statistical testing on academic datasets to uncover underlying student performance trends and learning metrics.
- Created comprehensive Tableau dashboards and automated visual data reports to facilitate objective, data-driven administrative monitoring.

EDUCATION

Muthayammal Engineering College *Expected May 2026*

Bachelor of Technology — Artificial Intelligence & Data Analytics | CGPA: 8.0 / 10.0

CERTIFICATIONS

- Decode Data Analytics Tools, Skills & Mindset — GUVI | HCL Technologies
- Data Analyst 101 — Simplilearn | Microsoft
