CAREER OBJECTIVE

Entry-level Electronics and Communication Engineering graduate seeking to apply strong problem-solving and programming skills to contribute effectively to organizational growth, with a focus on IoT and signal processing, while continuously learning and developing professionally.

EDUCATION

RMD Engineering College — B.E., Electronics and Communication Engineering *Chennai, Tamil Nadu | Pursuing*
CGPA: 7.62

Sri Kalaivani Vidhyalaya Hr. Sec. School — Higher Secondary (12th) *Chennai, Tamil Nadu*
Percentage: 78.16%

INTERNSHIP EXPERIENCE

Tamil Nadu Power Distribution Corporation Limited (TNPDCL) *Intern*

- Gained hands-on exposure to real-time monitoring, SCADA interface systems, and data logging & analysis.
- Studied alarm and protection systems along with power forecasting integration workflows.

Ashok Leyland *Intern*

- Learned the end-to-end manufacturing process of commercial vehicles, including chassis assembly, engine fitting, and quality testing.

PROJECTS

Smart Blinking Warning System for Speed Breakers

- Developed a solar-powered smart blinking warning system for speed breakers to enhance road safety in areas with unreliable power supply.
- Integrated a clock pulse circuit to enable blinking operation while reducing overall power consumption.

IoT-Based Smart Healthcare Monitoring System

- Built a real-time health monitoring system using IoT, integrating sensors for heart rate, temperature, and oxygen level.
- Transmitted sensor data via ESP32 to a cloud platform for remote monitoring, with alerts for abnormal readings.

TECHNICAL SKILLS

Programming Languages: C, C++, Java
Areas of Interest: Internet of Things (IoT), Signal Processing

CERTIFICATIONS

- NPTEL — Introduction to Internet of Things (IoT)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

LANGUAGES KNOWN

Tamil, English
